Résumé: (traduction alternative)
Tour with exit at the beach and little to no water.
At the exit, you can stop off at a restaurant right by the sea (cash only!)

Hydrologie: (traduction alternative)
Usually a tour with little to no water throughput.

Accès: (traduction alternative)
It is best to park at the entry (mountain side, not facing the river). If there is a second car, it can be parked at the "beach parking lot" (see map), otherwise it will be a longer walk back.

Approche: (traduction alternative)
Just cross the guardrail at the access parking lot and off you go!

Tour: (traduction alternative)
There are some fixed ropes in the tour. Be sure to wear gloves, as they are very rough and we destroyed our hands a bit....

Retour: (traduction alternative)
Follow the orographic right-hand path up to the parking lot, where in the best case the second car is parked. Otherwise, follow the road to the left from the parking lot until you reach the main road. Continue to the right until you reach the bends where you entered the stream.

Beautiful tour, clear water. Water level probably rather high. (traduction alternative)

Basically a nice canyon with cool rappels and if there is water in it, certainly with some cool jumps. Described in the Bich Canyoning Albania! Water was still walking from the parking lot at the entry, but it seeped away after a few meters just before the first rappel. The tour is well set up, partly with fixed ropes. You come out directly at a beautiful beach. (traduction alternative)
