Résumé: (traduction alternative)
Not a very interesting canyon. Nevertheless, the last 150 vertical meters consist of a sequence of about 10 rappels, before that you walk a lot on foot and rappel down a few individual obstacles.

Hydrologie:

Accès: (traduction alternative)
Park at the bottom in Turtig.

Approche: (traduction alternative)
You can take the gondola up.

Tour: (traduction alternative)
First there's a long run, then it gets more interesting, but then it's over again.

Anchors are either missing, rope tied through hangers, or rope around boulders, would be better if you could enter canyon from around 32TMS 07695 27757 on the RG or RD, as the remaining 90% of creek upstream is crawling through fallen pine trees and stinging nettle. One star is for the gondola ride up and 3 abseils in the last 100 m of canyon.
