Résumé: (traduction alternative)
Dry and very vertical canyon that allows us to do two activities, ferrata and canyoning, in the same day very close to the Congost de Mont Rebei.
The ferrata allows us to approach the head of the canyon (not mandatory) or return to the car depending on where we parked.

Hydrologie:

Accès: (traduction alternative)
We will have to be located in Àger to which we will arrive by the C12.
We have two options, to park in the Hermitage of Pertusa or in the Castell de Sant Llorenç (the track can be complicated with cars because they skid):
Pertusa option:
One kilometer from Àger towards Balaguer we have the detour to the right to Corçà (7kms) and we will continue towards Mont-Rebei by the Pertusa until the parking.
Option Castell de Sant Llorenç:
From Àger we will go north towards the Observatory of the Universe, we will pass it and climb a pass, here the road turns east overlooking the area of Àger, soon we will turn north again and at the next sharp right turn we will have a track on the left with a sign indicating Castell. We will get in here (be careful, the track does not have to be in good condition for cars, in general it is passable but after rains worsens). We will park next to the Mas.

Approche: (traduction alternative)
Pertusa option:
Following the marked path following the ferrata indications (white circles with a red dot), we will enter the Bco de la Pardina and start with the different sections of the Urquiza-Olmo ferrata (K3). Near the end of the ferrata we can turn left to the extension (K5) or Feliz Navidad (K6). If not we can continue straight ahead to the end of the ravine that has a path that takes us to the top.
We turn left and follow the path over the cliffs until we find the ravine and the handrail for the entrance.
Option Castell de Sant Llorenç:
From the parking area we will see the path that goes to the NW along the cut (not the track).

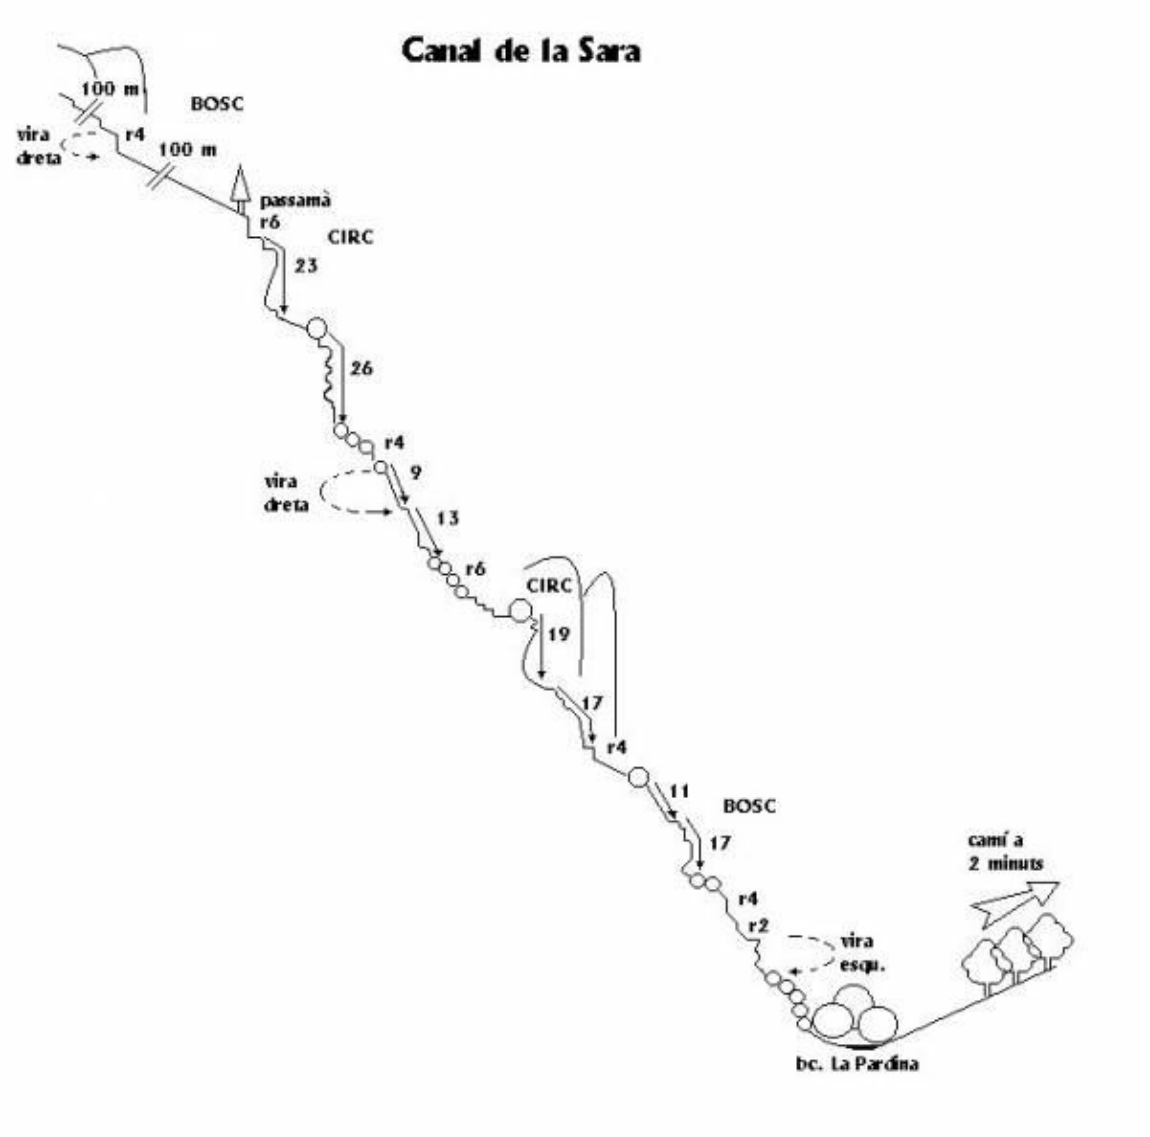

Tour: (traduction alternative)
Very vertical canyon and without water, if it carries something is because it is raining hard in the area. It is accessed by a handrail to enter the cirque where the rappels will follow one after the other until the Pardina gully. They are rappels without great difficulty but some of them are very aesthetic in overhangs.

Retour: (traduction alternative)
From the Bco de Pardina we can return to Pertusa by the outgoing path.
Or we turn left towards the Castell going up the Via Ferrata.
