Matériel:

Résumé: (traduction alternative)
Jungle canyon, long, hard, not easy both in its progression and in its waterfalls. It will force us to combine vehicles, be very careful in the 2 long verticals and walk through areas with too much vegetation. Quite an adventure to be done after rains to have the right flow.

Hydrologie:

Accès: (traduction alternative)
Bcos north zone of Gomera
We are located in the north zone, in the surroundings of Hermigua and the reservoirs of Mulagua and Monteforte. Passed the p.k. 19 in Hermigua we have on the right a road that takes us through the ravine of Liria until a curve in which the road turns and no longer goes up this ravine, here we can leave the car of return.
With the access car we will have to go to Los Aceviños and the road that takes us to the north with our ravine on the left, when arriving at the hill where the road turns to the left, we have a track in front where we would go to the telephone towers over Agulo, a few meters before on the right there is a track in bad condition where we can park.

Approche: (traduction alternative)
We will go down the track to the ravine

Tour:
Ver topo

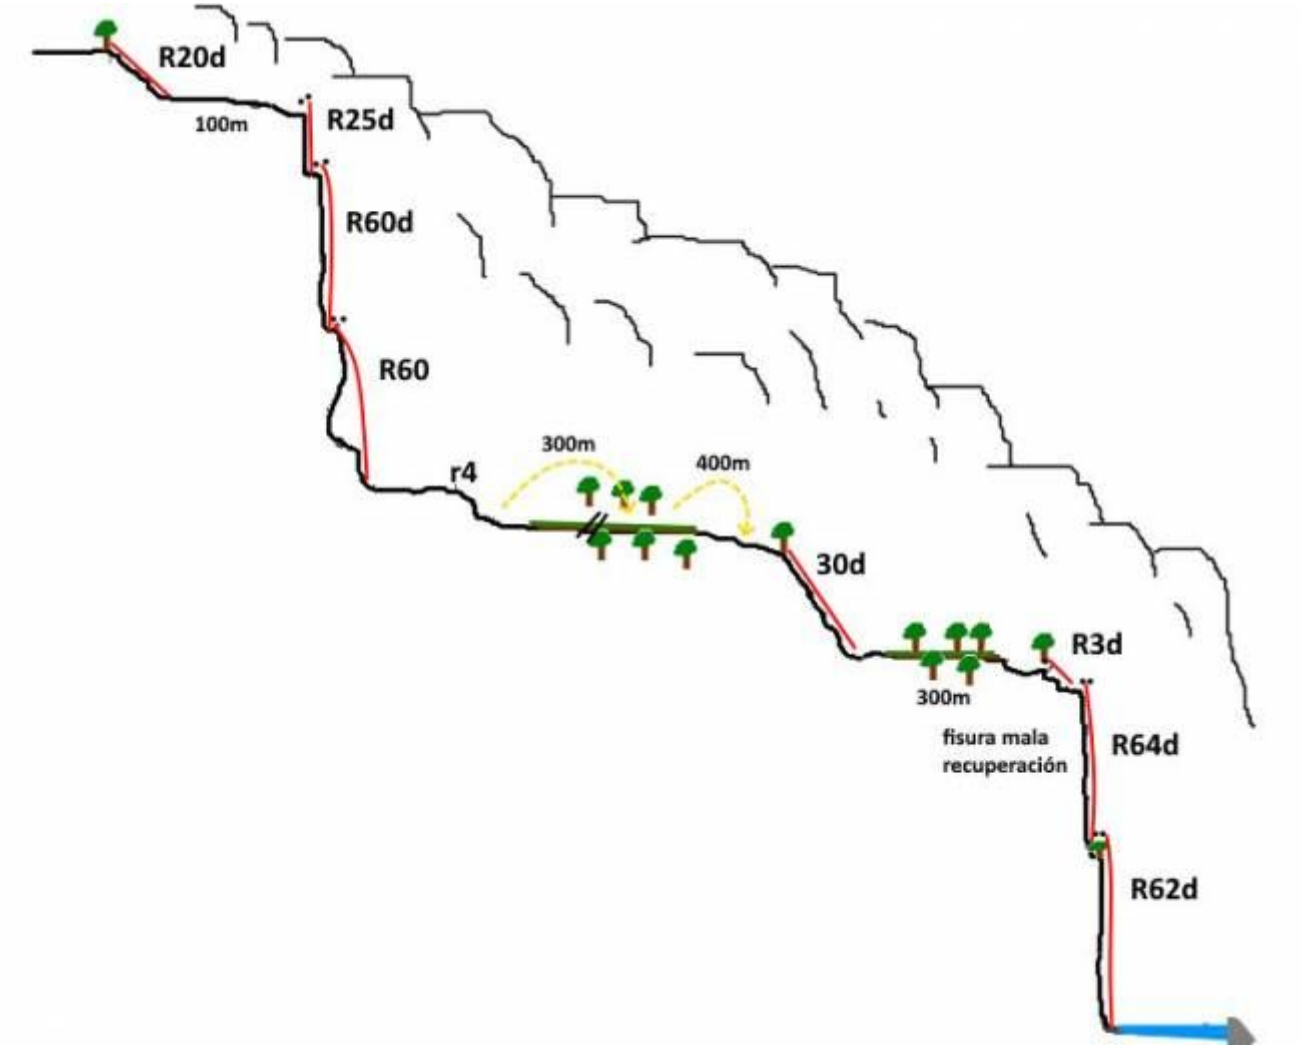

Retour: (traduction alternative)
Upon reaching the reservoir, depending on the volume of water, we will have to swim or walk along the shore to the dam, from there on the left we will go to a path that will take us down to the bottom of the ravine on the other side of the dam, from here a track will take us to the curve where we have parked.

Coordonnées:
Départ du Canyon 28.1540 -17.2135
