2025-10-14 Darko ★★☆☆ 📖★★ 🚧 🌊 Normale 🍌 Terminé The Vruća River Canyon is a pearl among Montenegrin canyons. It is approximately 7 km long and is certainly the longest canyon in Bar. It has over 30 verticals, the highest of which is approx. 25m. It has several natural dams and pools, which are the main characteristics of this canyon. The start of the canyoning tour is in the village of Veliki Mikulići, and the end itself is in the vilage of Bartula. It takes about 5/7 hours to overcome this canyon. The canyon is attractive in the period April/May/June and the period after the first autumn rains in October/November.
