Spécialités:

Matériel:
Cordes: 2x30m

Résumé: (traduction alternative)
Due to water drainage, generally canyon with little water, deeply incised.

Hydrologie:

Accès: (traduction alternative)
In Maurach at the southern end of Lake Achensee, drive towards Pertisau. 180m after the traffic circle turn left over the track of the narrow-gauge railroad into Weissenbachstraße. We drive to the district of Lärchenwiese and through this district. After 700m (from the railroad track) we reach the edge of the forest.
On the left in front of us is an open meadow. On the right at the edge of the forest is a parking area where we can leave the car.

Approche: (traduction alternative)
We take the gravel road along the edge of the forest (no driving). We enter the forest and at the fork in the road (350m from the parking lot) take the slope down to the left ("Zur Ebnet - Rodelhütte - Jenbach"). About 100m further on we turn left again at a sharp angle and after another good 100m we come to the bridge over the dam at the beginning of the canyon.

Tour: (traduction alternative)
From the struts under the bridge, you descend the dam into the bottom of the gorge. Now alternate very short runs with rappels and downclimbs until you reach the canyon exit. At the end of the season it is often very slippery, so downclimbing is out of the question (especially when the water level is high) and the number of downclimbs is 11.

Retour: (traduction alternative)
At the debris barrier on the left, follow the trail up to the forest path. Turn right here to a meadow and a playground. From here there are two options:
1) Keeping left, we come up to the entrance to the gorge. From here, take the approach path back to the car.
2) Follow the wide road on the right for a good 100 m, then turn left uphill to a meadow, cross it towards the forest and the mountain. Turn right to the car (20 min in total).

Very short canyon, ideal for beginners. Certainly more rewarding after rainfall. (traduction alternative)

2025-08-01 | Emi | ☆ ☆ ☆ |🕮 |⚓ ★ ★ | 〰 Haut | 👍 Terminé
Even when it rains a lot, like now, the canyon only carries 1 to 2.5 m³/s. Very relaxed. The anchors are good. Limited parking spaces. Access to the canyon: Past the Haaser vacation apartment, straight out towards the mountain and follow signs for the toboggan hut until you reach a bridge. The first rappel is under the bridge. Exit: The canyon opens up and there are more bushes. Relatively immediately after the last stone wall, turn left up through the bushes. There is a kind of path but it is relatively wild until the playground. After the playground, follow the signs to Lärchenwiese. (traduction alternative)

The anchors are fine. Presumably someone has already been in there . We have replaced one anchor . Attention!!! Do not park on or near the meadow in front of the penultimate house with vacation apartments. See photo. We were badly insulted by the landlord. The described parking lot no longer exists. Parking possibly below at the large meadow. Nice narrow canyon with 11 rappels about 1 hour. (traduction alternative)

Automatisch importiert von Descente-Canyon.com für Canyon Weissenbach Air 2° au parking, un super débit après plusieurs jours de pluie. Certaines ancres (single) sont déjà très branlantes, un rééquipement complet semble urgent. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23493/observations.html)

The first (single) anchors are already wobbly, the equipment is no longer up to date, a complete renovation would be appropriate. We entered after 5 days of moderate to heavy rain at a higher water level. Extremely short walking passages in the canyon and many small and three higher abseils. A little bit of wood but not disturbing. A worthwhile canyon at this water level. (traduction alternative)

2024-09-09 | Christian Balla | ☆ ☆ ☆ |🕮 ★ ★ |⚓ ★ ★ | 〰 Normale | 👍 Terminé
After rain the amount of water in most canyons was too high, here it was perfect. A very beautiful canyon with water (traduction alternative)

Automatisch importiert von Descente-Canyon.com für Canyon Weissenbach Après une nuit de pluie abondante, de nombreux autres canyons de la région étaient trop chargés, mais le Weissenbach avait un débit correct. Canyon très agréables, profondes et étroites, pas de marche dans les gorges. Un court trajet d'approche et un retour raisonnable sur une large piste forestière. Seuls les premiers mètres du chemin de retour à travers la forêt ne sont pas très clairs. Et l'équipement dans les gorges est tout de même assez archaïque. No running water. Now and again a pool of water. Deep, impressive rocks. (traduction alternative)

Rained quite a lot in the morning, was still dry in the early afternoon. Still quite beautiful though. Very slippery! Anchors okay.
