Résumé: (traduction alternative)
Fun canyon with a multitude of abseilings, skills and slides. Some of the skills are equipped because in spring with the thawing of the river can become complicated. A first part without great interest and a very interesting central area.

Hydrologie:

Accès: (traduction alternative)
In Andorra La Vella we will take the CG3 towards Ordino and La Massana.
Arriving at La Massana we will continue on the CG3 towards Ordino and we will arrive at Llorts.
In the village as soon as we enter we have a street on the right that goes down to the river, we get in, cross the river and on the left there is a place to park.

Approche: (traduction alternative)
We will leave the same track that is GR and the Ruta del Hierro (Ferro) and soon we will take the path to the right "Bordes d'Ensegur i coll d'Arenes". This trail will begin to climb up the slope towards the river, which we will cross by a footbridge (return point) and continue climbing until we find a sign that tells us where to leave the trail to the left (at about 1750m altitude). If we go too far we will reach the Bordes and we will have 400m of river without anything remarkable.

Tour: (traduction alternative)
Open descent with the possibility of escape almost continuously. Except with high spring flows, the rest of the time it is an easy descent.
There are multiple equipped skills and slides that with summer flow it will not be necessary to install.

Retour: (traduction alternative)
When we reach the footbridge, we will undo the way up.

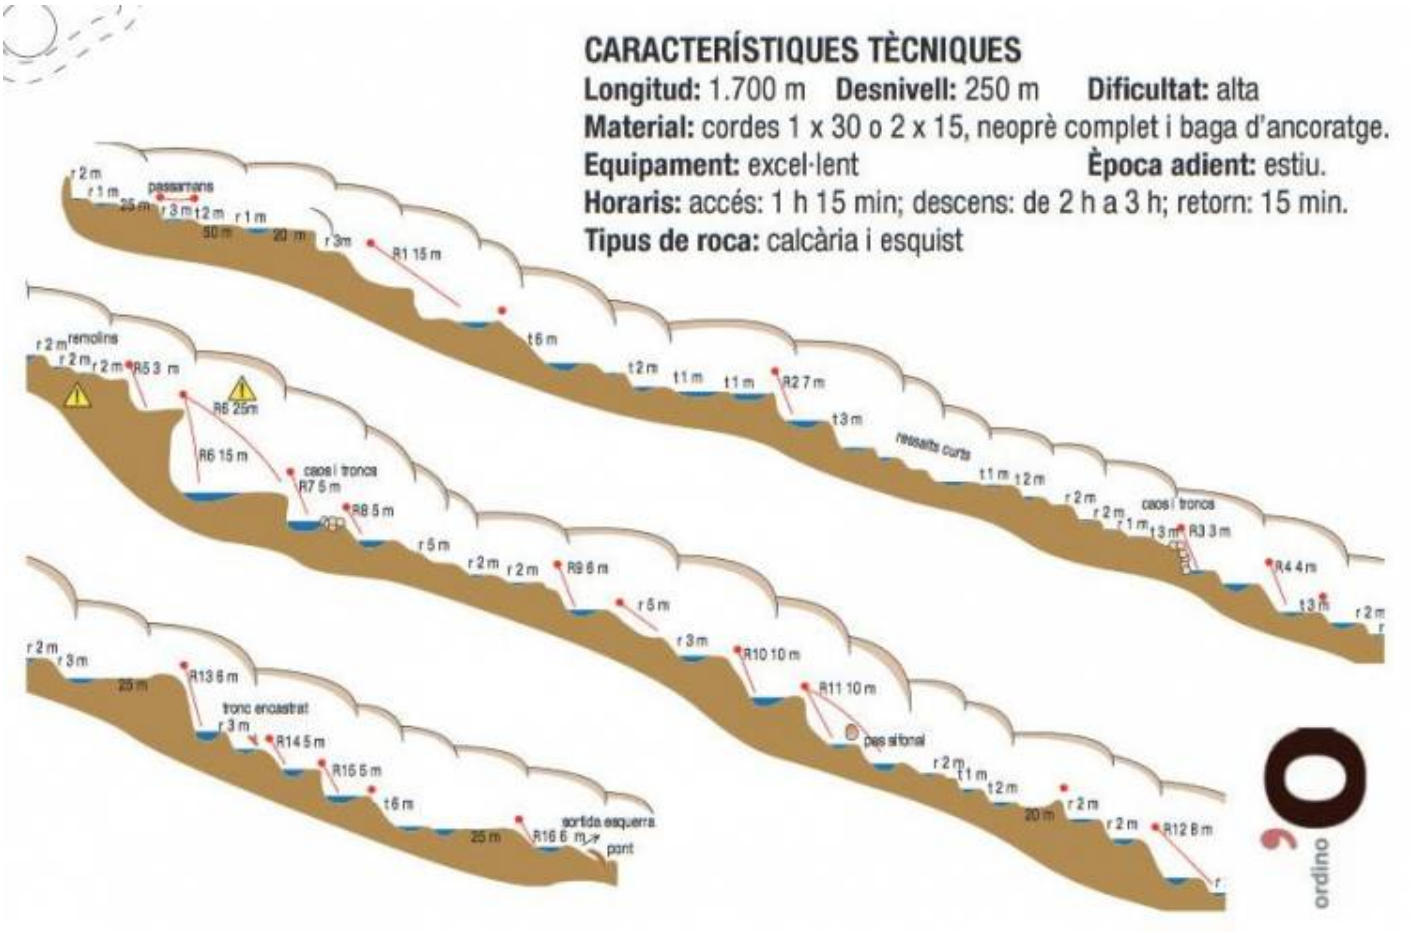

Coordonnées:
Départ du Canyon 42.5926 1.5361
Fin du Canyon 42.5951 1.5301

2025.8.15 Also done by group of 15 friends from Lituania. Bolts OK. Water level low. Many small rappels & tabogans. Aproach 1;15 Done in 2:30 It is better to park car in la Cortinada and go by public (0,20€/persons, ~3 km, each 30 minutes) bus to Llorts & here start aproach. After canyoining recomend return by the river (Fero route) and back to the car in la Cortinada
