Pays: Österreich / Austria Région: Salzburg Sous-régione: Bezirk St. Johann im Pongau Ville: Bad Gastein		
Difficulté: un peu difficile	Niveau: v3 a4 IV	Temps total: 3h25
Temps approche: 50min	Temps tour: 2h30	Temps de retour: 5min
Altitude d'entrée: 1020m	Altitude de sortie: 870m	Altitude du delta: 150m
Longueur du canyon: m	Rapelle le plus haut: 40m	Nombre de rappelles: 8
Transport: Voiture facultative	Type de roche:	Zone de prise d'eau: 35.00km²
Saison: juillet - novembre	Orientation: Est	Meilleur moment:
Évaluation: ★ 3.5 (1)	Info: ★ 2 (1)	Belay: ★ 1 (1)
Spécialités:		
Matériel: Cordes: 2*40		
Résumé: (traduction alternative) A Tauern stream with some very beautiful highlights, but unfortunately also longer, arduous walking passages in between. Please note: there is a power station above that is automatically regulated. The Angerbach has a relatively large catchment area. Only go after several days without rain and in safe conditions - not during the melting period.		
Hydrologie: (traduction alternative) Catchment area of over 35 km², with a discharge for a power plant that is automatically controlled.		
Accès: (traduction alternative) From Hofgastein drive in the direction of Bad Gastein. After the traffic circle 'Bad Hofgastein Süd' turn right at 'Café Schneidiges' and continue in the direction of Hartl. Shortly before the first hairpin bends there is the possibility to park 1-2 vehicles at the roadside. Alternatively, you can take a second vehicle to the Angertal lift station and start from there.		
Approche: (traduction alternative) You can either start from the parking exit or from the Angertal parking lot in the direction of Hartl. Above Hof there is a small path that leads to a pasture. Afterwards, the trail leads cross-country through the forest in a northerly to north-easterly direction		
Tour: (traduction alternative) You start with a walking passage through difficult terrain (slippery, block climbing, lots of trees) to reach the first abseil points. This is followed by three beautiful rappels, all of which are shorter than 20 meters. On the last rappel, you can ideally slide down on the left side into a very deep pool. This is followed by another arduous walking passage to the next steeper part. This begins with a jump or a slide or rappel (a saw is recommended to clear the slide of obstacles). This is followed by another 4-5 rappels. The first complete ascent took place in 2021, and there have been no known repeats since. In any case, you should take sufficient equipment with you. Unfortunately, I no longer know the exact lengths of the abseils, but I estimate the longest abseil to be around 25 to 35 meters. I therefore recommend taking two ropes with a length of 40 meters.		
Retour: (traduction alternative) Get out on the right and walk a few meters across a private property to the car.
