Résumé: (traduction alternative)
A challenging canyon with high water flow.

Hydrologie: (traduction alternative)
A south-facing stream that always carries a large volume of water.

Accès:
Von Chur in Richtung San Bernardino fahren. Die Ausfahrt Splügen (Nr. 28) nehmen und anschliessend der Beschilderung in Richtung Splügenpass folgen. Vor der nächsten Kreuzung den auf der linken Seite gelegenen Parkplatz benutzen.

Approche: (traduction alternative)
Follow the hiking trail uphill on the orographic right side, parallel to the canyon. At an elevation of about 1,730 hm, a path then leads directly down to the Bauch.

Tour: (traduction alternative)
A surprisingly deep canyon with some pretty swirling pools. A drift anchor can be helpful. A hike along the stream bed with a few rappelling spots after the steepest section.

Retour: (traduction alternative)
Follow the stream all the way to the village.

Walked along the Kapellbach afterward. The water level is still good. The water is clear and cool. (traduction alternative)

Water level is not a problem. Very slippery. Drilled 1 anchor (to make a 2–3-meter "downclimb" safer). (traduction alternative)

At the second rappel point (C13), where the canyon narrows, there was a mushroom in the pool. It kept washing the anchor back. Since none of us were familiar with the canyon and the water level seemed higher than usual, we climbed back up using the rope from the previous rappel point (C8)—which hadn’t been retrieved yet—and exited orthographically to the left via some climbing, then returned to the streambed. The access is steep but beautiful. Anchoring: solid bolts in good condition with rings. (traduction alternative)

Anchor monopoint, but very good. Some searching in places. Overall sparsely drilled, but works at "normal" water level (which is already ample). Some downclimbs are tricky. 1x AN and 1x rappel on the old weir crown on the metal. Grip mostly very good, except for the crux at the beginning. Be sure to stay on the rope to set up the next ropes. Panic exes and good height are an advantage ;-) There is a lot of wood in the lower third, which is also helpful for downclimbing. The canyon and rock formations are very impressive. Steep access, but a picture book! (traduction alternative)

Top conditions. Water level unproblematic. Stands sometimes difficult to reach. Certainly not to be underestimated with more water. Anchors set below the bridge at the penultimate spot. Great short tour for lovers of big flows (traduction alternative)

Currently very good conditions. Very good grip, all anchors available. (traduction alternative)

Normal water edge for this canyon. No floating anchor necessary at the moment. All pools are safe. (traduction alternative)

Un mouton mort au début du canyon encore entier. Très joli encaissement et série de rappels dans la faille. On a rajouté une plaquette dans l'enchaînement. Des mouvements d'eau qui n'ont pas posé de grandes difficultés. Malgré le gros debit, peu de cascade dans l'actif. On s'est garé sur un parking gratuit de l'autre côté de la rivière à côté de l'arrêt de bus , au soleil toute la journée dès le matin. Téléphone perdu dans le canyon.

Jolie canyon en gros débit, au niveau de la 12m dans l'encaissement une plaquette était manquante sinon ça passe sans soucis malgré le débit important, un téléphone à été perdu dans la marche de 100m.

Water very cold but ok, 1 hook goes off at the 10m slide. But it can be solved with a wild jump. Great tour with lots of water flow. (traduction alternative)

GeileTour, high water flow, 1 drill tab goes off at the 10m slide, slide is dangerous rock nose, better jump, without drill tab was solvable by a wild jump. (traduction alternative)
