Résumé: (traduction alternative) Open canyon with decent water flow. Very slippery rock.		
Hydrologie:		
Accès: (traduction alternative) Parking entry: From Reutte via Pflach and Unterletzen in the direction of Gasthaus Bärenfalle. From the direction of Füssen on the L69 via Musau approach. Pass the inn and follow the forest road for a short while - many parking possibilities. For the alternative access on the orographic left side of the stream, we park the car on a forest road next to the bridge of the L69 over the Sababach.		
Approche: (traduction alternative) Via the forest road (Reintalstraße) or on shortcuts into the Reintal valley in the direction of Musauer Alm, Otto-Mayer-Hütte to the bridge over the Sababach. Entry before the bridge right down into the streambed. At the alternative access (recommended if there is no possibility of transfer) we follow the forest road on the orographic left side of the slope to the foot of the slope, turn right (north) and hike along the foot of the slope, finally pathless, until we meet the hiking trail coming from Musau. Now (at 835m altitude) we turn left and walk up the Achselsteig into the forest (signpost "Musauer Alm, Otto-Mayer-Hütte, ..."). We cross a yoke ("Achsel" - 1140m altitude) and follow the forest road downhill to the stream. Even before reaching the bridge on sight pathless left down into the streambed (1090m altitude).		
Tour: (traduction alternative) First forest gorge with mostly sloping rappel, then narrower but short Schrofenschlucht before you stand above the big waterfall. Mostly decent water flow, but you do not get to feel in the rappel. To reach the rappelling points, however, the current must often be crossed, which is not unproblematic because of the extremely slippery rock. Above the two highest rappels you meet a via ferrata - either cross to the left or cross from the right over a two-rope bridge to the rappel stand on the left side (here also directly rappel possibility in 2 rappels). From the top it goes alternatively 27m down, then another 43m right in the dry. In the last part there is a short rappel feeling - rappel 18m under the clamping block (alternatively on the right between the two water footholds in the free slope), finally rappel 4m and 10m over a double step (attention: hollow space on the left in the first part) through the water. In case of strong water flow, dry rappel from the top left.		
Retour: (traduction alternative) Orogr. left to a disused sawmill ("Höllmühle") and hike along the forest road to the main road (parking for second car). Return along the road to the parking entry at the Bärenfalle inn.
