Specialità:

Attrezzatura:

Sintesi: (traduzione alternativa)
Also known as the ravine of the Hermitages, by the route that leads to it from Yebra de Basa. It is a ravine that is located in the cliffs where we can visit these hermitages, with a beautiful 50m rappel that, after rainfall, gives us a unique spectacle. Once we have descended it we will be able to continue along the bed of the river seeing small cavities and descending small rappels of up to 20m.
We will have the option to make a combination of cars or go up by the path of the hermitages but with so many meters of rope it will not be the best idea.

Idrologia:

Accesso: (traduzione alternativa)
We must be located in Yebra de Basa.
From Huesca towards Pamplona (or vice versa) by the A23 (N330) to Sabiñánigo. Here we will turn off towards Fiscal on the N260, along which we will go 5 kms until we reach the Yebra de Basa turnoff.
We will cross the village until the detour, next to the stream, of Santa Orosia. After 50m we have parking for the return car or if we want to walk up.
If we have a combination of cars or we want to go up with the car on the track we will continue straight ahead for 11 kms until we pass the walls of Santa Orosia, before reaching the chapel, the track crosses the stream, a little before we can park.

Avvicinamento: (traduzione alternativa)
From the upper parking you just have to follow the riverbed through the badinas to the great vertical of almost 70m.
From Yebra we will follow the marked path of the Hermitages that goes up by the orographic right of the river, crosses the stream (end of the descent) and already by the left it approaches the walls of the hermitages. The last stretch of ascent is by the strip that takes us to the top.

Giro: (traduzione alternativa)
Spectacular vertical above the hermitages, in which we will be hanging over them.
From here a typical descent between blocks of conglomerate with rappels up to 18m and several slides.
We should not miss the small caves that we will find along the descent (foresee frontal) because some are real gems.

Ritorno: (traduzione alternativa)
When we reach the junction with the path of the hermitages we finish. If we have a car at the bottom, it will be a matter of following the path for about 30-40min. If we only have a car at the top, we will have to ascend by the mentioned path.

Coordinate:
Inizio del canyon 42.4892 -0.2825
Fine del canyon 42.5025 -0.2608
