Specialità:

Attrezzatura:

Sintesi: (traduzione alternativa)
Short tour that is worthwhile in combination or as a pre-tour to Torrente Leale

Idrologia:

Accesso: (traduzione alternativa)
Take the A23 to the Osoppo exit, turn right here towards Tolmezzo and continue towards Trasaghis and Avasinis: Drive through Avasinis and just before the end of the village turn left onto a sand road (easy to miss, about 100m later you cross the Torrente Leale). Follow the sand road over a ford and park after a meadow (parking for 4-5 cars). Do not park in the area of the ford.\n\nIf you want to get on from above: Just before the center of Avasinis, turn left up the mountain (signs: Monte Prat), after about 3km you will reach an iron fountain on the left, just after it a private road goes to the right while the road goes to the left. Park in the area of the fountain.

Avvicinamento: (traduzione alternativa)
From above: like Leale - descend to the mouth of the Riu dal Boschet into the Leale. Then ascend on the orographic left side of the Riu dal Boschet until you reach a rugged ridge after about 25 minutes, descend here into the small saddle and follow an overgrown path to the left. This path leads past some ruins to a bridge over the stream. Entry here.\n\nFrom below: From the lower parking lot, hike into the valley, bypass the first scree barrier on the left and continue until you are in front of the gorge. About 100m before the gorge, a clear path leads off orographically to the left, follow this path upwards, keep right at the first fork, climb upwards at a fork in a chute with a boulder. From here it is quite steep uphill, if in doubt keep left. You soon reach a small saddle, cross here to the left until you reach the ruins and a little later the stream.

Giro: (traduzione alternativa)
Hiking/downclimbing with 4 rappels up to 18m and some slides and jumps.

Ritorno: (traduzione alternativa)
Either canyoning through the lower gorge of the Leale or on foot via the path that bypasses the gorge on the orographic left bank. The path starts at a wet rock face about 50m below the mouth of the Riu dal Boschet.

For a quite little side trip, was surprised to find a few nice bolts in here. Worthwhile little side trip if you have time going down Leale. We walked up after the jump into the massive pool, on the left side. It was probably about 200m of elevation roughly, and it took about 20min in the wet suits. A few really nice abseils in this section! Only worthwhile though as a side trip to Leale.
