Specialità:		
Attrezzatura: Corde: 2x 30m		
Sintesi: (traduzione alternativa) Short tour with some nice spots; slides only conditionally possible; small jumps and 2 medium-high rappel; a few short rappel places; partly slippery; at the beginning short walking passages. Until the middle of the summer high water flow!		
Idrologia:		
Accesso: (traduzione alternativa) From Biasca --> ri. North --> at the traffic circle continue towards the San Gotthard mountain pass --> straight on from the freeway bridge --> after the road climbs and after a few hairpin bends on the left is the turn-off for Nivo/Chironico --> after the bridge drive through the village --> continue past the church to a no-passing sign --> continue here --> after approx. 900m is another bridge with a turnout --> park here (entry at approx. 770Hm).		
Avvicinamento: (traduzione alternativa) From the bridge on the right side of the road on the left side of the Barougia river(s) another 50 m downstream.		
Giro: (traduzione alternativa) After the water level control at the entry you have a short walking passages to the first downclimb passages (10m left from the tree --> walking --> 6m left from the tree) --> jump of approx. 6m --> after the pool you could get out right --> over a small conifer on the right you overcome the safest the approx. 10m into the pool before the stone bridge (possibly downclimb and slide) --> after the bridge comes the highest downclimb with approx. 30min deep pools (stand on the right, somewhat exposed) --> a tree entanglement follows with a 6m rappel, a R4 on the left and C25 on the right --> after the next small pools comes a short downclimb in a narrower canyon section --> from a bolthook on the left you rappel about 10m into the next pool --> the following places are best rappelled --> at about 660Hm the tour ends in front of a weir (the 40m rappel after the weir was not done during our ascent).		
Ritorno: (traduzione alternativa) A few meters above the water diversion out to the right and on the path up to the road (do not take the power plant path, which leads a few meters after the start of the path horizontally and wire-secured slightly downhill!).

Better equipped than the upper neighbor. You also have to go through less water here. We moved quite quickly. After 45 minutes, we were at the end.
