Paese: Österreich / Austria Regione: Salzburg Sottoregione: Bezirk Hallein Città: Hallein		
Difficoltà: facile	Grado: v1 a2 II	Tempo totale: 1h35
Tempo avvicinamento: 0min	Tempo giaro: 1h30	Tempo ritorno: 5min
Altitudine di entrata: 550mm	Altitudine di uscita: 475mm	Altitudine delta: 75m
Lunghezza del canyon: 1300m	Rapel più alto: 8m	Quantità rapelli:
Transporto: Auto facoltativa	Tipo di roccia:	Area di ingresso:
Stagione:	Orientamento: Sud-Ovest	Tempo migliore:
Valutazione: ★ 2.4 (5)	Info: 📖 2 (3)	Belay: ⚓ 2 (3)
Specialità:		
Attrezzatura: Corde: 1x20m (optional)		
Sintesi: (traduzione alternativa) Beginner's tour; hiking, jumping and swim canyon; also suitable for young people; versatile jump heights (jumps of 1-15m are possible); by dam very safe (even in the rain); short, but very beautiful; on weekends heavily frequented, by carelessness some unnecessary accidents have already happened.		
Idrologia:		
Accesso: (traduzione alternativa) Coming from Hallein, take the Wiestal highway to the large dam parking lot on the left side (parking lot in front of the dam wall crossing).		
Avvicinamento: (traduzione alternativa) Directly at the parking lot you can descend orographic left in the forest and enter the gorge below the dam wall via an aluminum ladder.		
Giro: (traduzione alternativa) The Almbachklamm is ideal for beginners, young people or larger groups suitable --> by the dam wall, the gorge is relatively safe even with a lot of water (rain) --> It carries water all year round, but in varying quantities, therefore: Caution with high jumps --> There are many possible jumps --> shorter swims bring refreshment again and again --> In the middle part of the tour you pass a large rock (right), which has similarity with a face ("the Face" climbing up and jumping only for experienced and after checking the water depth) then follows the "Jump Temple", various jumps with 5/8/10m (or slide and diving cave). After two slides (jumps) you reach a narrow part which you swim through --> After a small jump in deep pools comes the last descent (iron stirrups) then it goes about 100m over conglomerate rock to a larger water basin. At the exit of the water basin a steep path leads up to the road on the left. Unfortunately, there were in the past again and again problems with the private owner therefore it is recommended to go up to the power plant to get out there left (transfer car or bicycle necessary because pedestrian ban!).		
Ritorno: (traduzione alternativa) On the main road you get shortly back to the parking lot (Attention: only with a bike or shuttle car allowed!) --> Another option would be after the small slide, the way right up u. in the canyon back to go.
