<b>Specialità:</b>		
<b>Attrezzatura:</b> Corde: 2x40m		
<b>Sintesi:</b> (traduzione alternativa) Small catchment area; can be combined well with Rio Pliz (recommendation: first Rio Pliz then Rio Malimberg); several rappelling points up to 20m; nice single points; clean water, short access		
<b>Idrologia:</b>		
<b>Accesso:</b> (traduzione alternativa) From Hotel Carnia take the SS13 in the direction of Tarvisio. At the exit of Chiusaforte turn right towards "Sella Nevea"/Raccolana. Follow this road straight on, go through the avalanche gallery and continue straight on. About 4 km after the avalanche gallery you will reach the village of "Saletto". Here you turn left (over the bridge) towards "Chiout Cali". At the entrance of the village you cross "Rio Malimberg". Immediately after the bridge park on the right (next to the power house).		
<b>Avvicinamento:</b> (traduzione alternativa) At the power house after the bridge you can already see the hiking mark 641 (Attention: in the Tabacco map the hiking trail is already marked before the bridge. But this is wrong!) Immediately after the power house you follow the access road up to the 1st house. The path goes between the houses until you reach asphalt again. Here turn right in the direction of the electricity pylons, where there is again a trail marker 641. From here, follow path 641 until you reach the wooden bridge that crosses the Rio Malimberg. Attention, just after the bridge an inconspicuous steep path goes up on the left. With a quick gain in altitude (on the orographic left side of the gorge) you will soon be at the entry, at 690Hm.		
<b>Giro:</b> (traduzione alternativa) The Rio Malimberg inferiore is a beautiful, short, technically not too difficult tour, which definitely has a lot to offer. Due to the characteristics, the canyon is also suitable for beginners, but also has enough potential for experienced canyoneers. Most of the rappels are easy to see and the pools are not deep. Some rappels are in the watercourse and provide refreshment. The canyon is very continuous from start to exit, with only short walking passages. At the wooden bridge you have the possibility to get off on path 641. However, the further descent pays off in any case (disturbing here is only a water drainage, which suddenly disappears in the field).		
<b>Ritorno:</b> (traduzione alternativa) At approx. 570Hm before the road bridge, get off on the right to the parking lot/power house.

Very nice canyon after the almost constant rainfall of the last two days. Short, but that was nice on departure day. Surprised by how much I liked it, but can imagine it is less fun with less water. The approach is rather steep and gravelly, be careful.

Nice, short abseil tour, which is also superiore in and after rain. Double glued anchors and even chain anchors everywhere. (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Malinberg Fait après la pluie et après Pliz. Aucun saut. Joli encaissement avec des roches polies, bien équipé. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22122/observations.html>)

The ascent is quite steep and arduous. The blue dots are very helpful and make it much easier to find the way. The anchors are close together. You don't have to walk much in the stream. Anchor 2 is the most exposed. You also pass it when crossing the stream on the way there. I have no idea what the handwritten "No tassable" on the river sign at the parking entry point is supposed to mean. At first we wondered whether it meant "no passable".

A little slippery and not enough water for the time of year. We have never done this tour due to its brevity. Up 25min, canyon 1h. All stands OK. An old ibex was our companion from the start. (traduzione alternativa)

The wooden bridge from the description of the access no longer exists. Stands all superiore, only bolts at rappel 3 are still hanging out. Auxiliary ropes also still present and in good condition. Sun from midday. (traduzione alternativa)

Again used as an alternative stream as Favarinis and Pissanda still had a little too much water. (traduzione
