Sintesi: (traduzione alternativa)
Rappel canyon in mostly naturally cloudy water

Idrologia:

Accesso: (traduzione alternativa)
From Digne-les-Bains on the N 85 a good 10 km southwest towards the A 51 or Sisteron. In Mallemoison, turn onto the D 17, which heads north towards Thoard (13.5 km from Mallemoison). Pass Thoard and continue, first on the D 3, later on the D 117, keeping right at junctions, to Duyes. 600 m after Duyes, we cross the Bramefan. From the bridge, continue uphill for another 2.7 km, passing the entrance to a religious sect ("Communauté de l'Esclache"). At a sign ("Circuit des Brigands"-"Site des Tidalites") we turn left onto a dirt road, which we follow for about 400 m to its exit. Here you can turn around and park.

Avvicinamento: (traduzione alternativa)
We take the path that joins the slope, walk uphill first towards the canyon and later along the top of it. Then we take the path that leads down to the stream on the left.

Giro: (traduzione alternativa)
The stream has hardly any water in midsummer, but turns a dirty brown color after rainfall (photos). Nevertheless, a visit is recommended, especially when other canyons in the region are carrying too much water. Permitted from May 1st to November 20th from 10 am to 6 pm.

Ritorno: (traduzione alternativa)
Where the canyon exits (after the 17 m ropes, a longer downclimb and run and a final 4 m ropes), leave the stream (Steinmann) and follow the tracks that lead into a wooded hollow, which is bordered by a rock face to the south (pay attention to this during access!).
Where the clear tracks exit at the head of the valley, do not climb steeply up to the right, but continue left and then up onto the left (northern) ridge, where you will come directly to the parked vehicle (without a path).

Automatisch importiert von Descente-Canyon.com für Canyon Bramefan Très joli. On a pris notre temps pour faire de la formation. Par contre un certain nombre d'amarrages sont vraiment bizarrement placés (frottements...) (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2104/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Bramefan Superbes conditions. Retour sans pb. Deux gros cairns en RG. Les 200 premiers mètres de la piste sont marquées privé. Si on veut les éviter, se garer à la chapelle juste au dessus (large parking). Mais ça rajoute 20 min aller et 20 minutes retour. Automatisch importiert von Descente-Canyon.com für Canyon Bramefan Ça tabasse pas mal dans Bramefan avec les pluies de cette semaine, très sympa avec ce débit ! Contrairement au topo, la sortie est assez évidente, des cairns sont bien visibles a gauche a l'endroit de la sortie et le sentier assez bien marqué. + D'infos 0618522515 (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2104/observations.html)
