Paese: Österreich / Austria Regione: Tirol Sottoregione: Bezirk Schwaz Città: Vomp		
Difficoltà: un po' difficile	Grado: v2 a4 III	Tempo totale: 9h30
Tempo avvicinamento: 4h	Tempo giaro: 5h	Tempo ritorno: 30min
Altitudine di entrata: 1040m	Altitudine di uscita: 670m	Altitudine delta: 370m
Lunghezza del canyon: 8000m	Rapel più alto: 7m	Quantità rapelli: 1
Transporto: a piedi	Tipo di roccia:	Area di ingresso: km ²
Stagione: settembre - ottobre	Orientamento: Est	Tempo migliore:
Valutazione: ★ 2.7 (2)	Info: ★ 0 ()	Belay: ★ 0 ()
Specialità:		
Attrezzatura: Corde: 1x20m		
Sintesi: (traduzione alternativa) hiking canyon		
Idrologia:		
Accesso: (traduzione alternativa) From Schwaz in the Inn valley to Vomp and in the village near the church north towards Vomperberg. At the following junctions always keep left in the direction of Gasthaus Karwendelrast. Park here.		
Avvicinamento: (traduzione alternativa) From the Gasthaus Karwendelrast (860 m above sea level) on a forest road approx. 1500 m in a westerly direction until a path (no. 224) branches off to the left to the "Hallangerhaus". Soon you come to the Haag Bründl (Stub Bach). Pass it on the left and continue westwards on the only slightly ascending path above the Vomper Loch. After about 45 minutes you cross the Kühsoachgraben (see video). You pass the game feeding station above the Melans-Alm (1020 m above sea level). About two hours from Karwendelrast, the hunters path turns north into the Zwerchloch, passes the hunting lodge and crosses the stream. It then leads upwards on the west side via the so-called cat ladder. Later, it goes almost all the way down to Vomper Bach and then on a wooden footbridge over the Ödkarbach. Here you can descend to the right above the mouth of the Ödkarbach waterfall into the Vomper Bach, especially if you want to avoid the possibly unpleasant entrance slide. The alternative leads further up steeply in serpentines in the forest and immediately down again under the Triefende Wand into the wide gravel bed under which the Vomper Bach flows - invisible until the entry (1060 m above sea level).		

Giro: (traduzione alternativa)

Due to its abundant water flow, the Vomper Bach is best (and above all safe) to hike in the fall and/or after long dry periods. If in doubt, skip the uppermost (narrow) parts and join the Ödkarbach (see above)
However, the first part is the most interesting. The canyon is something for lovers of combined tours with special scenic charm.

In Oct. 2006, the water under the slide was about 1.30 m deep at the beginning without any large stones. If necessary, you could lower the first person down here using a rope to check the situation (take a 20m rope with you - but no anchor available - 2006)).

Exit options after about a third of the canyon at the footbridge on the left up to the approach path, after about another third on the left up to the Melansalm (difficult to find). Last exit (left) 100 m after the Kühsoachgraben, without a path through the beech forest up to the Anmarschweg.

After a good half of the gorge hike, the water is completely diverted, but after just a few hundred meters the streambed fills up again with the amount we were used to before the diversion.

Ritorno: (traduzione alternativa)

At the power station (670 m above sea level), turn right over the ladder and down to the left of the water intake (the gate can be opened from the inside - 2006). From the partly concreted flat area, a path on the left leads up to Gasthof Karwendelrast.
