Sintesi: (traduzione alternativa) Watery rappel canyon, very commercialized. Private ascents are not permitted.		
Idrologia: (traduzione alternativa) Level may be up to max. 16cm or 0.8m ³ /s. https://www.hnd.bayern.de/pegel/iller_lech/winkel-11427603?		
Accesso: (traduzione alternativa) Coming on the B 308 follow the signposted path to Winkel to the parking lot "Starzlachklamm".		
Avvicinamento: (traduzione alternativa) From the parking lot, it takes about 15 minutes to reach the entrance to the Klammsteig on a well-maintained hiking trail. Here you can buy an entrance ticket (2007: 2,50 ₰) and continue along the path through the canyon until the path forks at the exit. Turn right over the wooden bridge and continue for about 100 m until you reach a bench on the orographic left side of the stream.		
Giro: (traduzione alternativa) At the first waterfall, there is no need to rappel through the water, even if it looks very unpleasant from below. If there is a lot of water, the narrow channel in the middle section may be tricky and you may have problems reaching the safety hook at the top left. The small waterfall below forms a siphon with the rock above, which can be jumped from after checking the underwater. Approach the final waterfall in the narrow chute on the right. For the long final slide, place your backside on the left-hand side of the edge of the swim pit, right on a slightly protruding nose, to get the best possible entry into the elevated bends. Even then, however, the slide is not controllable, the impact is usually broadside directly on the edge of the gorge below the rock, but landing on the rock and sliding into the water is also no problem. The gorge has the status of a natural monument and may not be entered before May 15th due to the dipper breeding season. The gorge is also heavily frequented commercially.		
Ritorno: (traduzione alternativa) After the last waterfall below the ticket booth, turn right up to the trail we came in on.
