

Lodrino (intermedio)

Lodrino intermedio, Lodrino, Val Lodrino intermedio

Creare: 2023-03-09 20:54:00	Aggiornamento: 2025-11-24 18:21:49	Stampa: 2026-06-07 08:06:29
Paese: Schweiz / Switzerland Regione: Kanton Tessin / Cantone Ticino Sottoregione: Bezirk Riviera Città: Lodrino		
Difficoltà: difficile	Grado: v4 a5 IV	Tempo totale: 3h15
Tempo avvicinamento: 30min	Tempo giaro: 2h30	Tempo ritorno: 15min
Altitudine di entrata: 650m	Altitudine di uscita: 490m	Altitudine delta: 160m
Lunghezza del canyon: 950m	Rapel più alto: 47m	Quantità rapelli: 9
Transporto: a piedi	Tipo di roccia: granite	Area di ingresso: 17.00km ²
Stagione: luglio - settembre	Orientamento: Est	Tempo migliore: 10-14 Ore
Valutazione: ★ 4.8 (26)	Info: ★ 2.6 (19)	Belay: ★ 2.7 (25)
Avvertenzas: inattivo: Evitare il disturbo attraverso il canyoning di massa (11.08.25 - 31.08.25) Dopo la RIC 2025 sono stati segnalati grandi gruppi che hanno causato rifiuti nei parcheggi, occupato proprietà private, festeggiato ad alto volume dopo il canyoning e parcheggiato senza considerare l'accesso degli abitanti locali. Le comunità locali sono già arrabbiate! Per evitare conseguenze negative e regolamenti, assicuratevi di agire nel rispetto dell'ambiente e delle comunità locali. Vi preghiamo di utilizzare ogni auto in modo completo per evitare la congestione dei parcheggi, di utilizzare parcheggi alternativi, di essere silenziosi, di limitare al minimo l'uso di fischietti nel canyon, di rispettare la cultura cattolica locale non spogliandovi in modo visibile e di utilizzare abbigliamento per la risalita. Non fate festa dopo il canyoning nei parcheggi e rimuovete i rifiuti per favore!		
Specialità:		
Attrezzatura: Corde: 2x 50m		
Sintesi: (traduzione alternativa) Rappel canyon in beautiful granite rock with optional jumps. Very beautiful, deep canyon with turbulent pools and crystal-clear water.		
Idrologia: (traduzione alternativa) Can only be walked on without risk after a long dry spell Indicative measuring point, no direct measured value: Little: <150l/sec; Medium: 150-400l/sec; Much: 400-1000l/sec>; Too much: 1000l/sec https://www.hydrodaten.admin.ch/it/seen-und-fluesse/stationen-und-daten/2612 ATTENTION: this measuring point is located in the Verzasca valley, on the other side of the mountain! Checking this value alone is in NO WAY sufficient to reliably estimate the flow rate in the Lodrino.		
Accesso: (traduzione alternativa) From the highway junction (Gotthard/Bernardino) in the north of Bellinzona, head north on the N 2. Shortly after passing through Cresciano, turn left and drive to the other side of the valley to Lodrino (approx. 12 km from the highway junction). Drive into the village (right) and after the bridge over the stream take the 3rd road on the left. Park your first car in front of the cemetery (the parking spaces in front of the supermarket and under the trees in the center of the village should not be used). Take the second car north towards Iragna and after almost 2 km (from Lodrino) turn left immediately after the houses of Rodaglio at a business (GPS coordinates: 46°19'02.46 "N / 8°58'19.70 "E) onto a small road that takes you up to the houses of Legri (a turn-off to the right). - Ignore the access road to the upper Iragna) Continue straight ahead on the small road until it exits onto an open area (helipad) (or continues as a dirt road in a westerly direction). Do not park on the large gravel surface here, as this is a commercial helicopter take-off and landing site! There are no stopping signs for a reason!		

Avvicinamento: (traduzione alternativa)

At the large open area (580Hm) a hiking path starts immediately to the right upwards --> follow this past the house and then without much difference in altitude along the canyon --> the path is exposed in some places and leads to the iron bridge that leads over the Lodrino --> cross the bridge and follow the hiking path to the third bend --> from here a very exposed path goes right next to the canyon to the stream (entry 650Hm). (approx. 30 minutes)

Giro: (traduzione alternativa)

! very dangerous if there is a lot of water!

After the spectacular access you continue in the stream --> the first cascade is bypassed on the left (left tree for rappelling) --> the next point can usually be jumped after checking the depth and strength of the current (attention, you have to jump far forward, the place is already known to the Swiss air rescue (REGA) as a frequently frequented accident site!) --> immediately afterwards follows the highest rappel with 47m (here you can rappel spectacularly free-hanging on the left at the water or on the right, but with strong rope friction.) --> from here the canyon runs deep --> further on you have several walking and small climbing passages --> jumps should always be controlled as the canyon changes a lot --> in the middle of the canyon there are short abseiling sections in the water course, which can be problematic at higher water levels --> the deep pools also often have a strong current and should not be underestimated --> at the end of the parts that have been rappelled there is a swimming passage --> from here you still have a walking passage and small climbs until the last rappel --> after the rappel you walk for a while through the now rather open streambed until you reach a bridge that runs only a few meters above the streambed (this is NOT the bridge known from the approach). The exit of the Lodrino intermedio is on the left bank of the bridge.

Ritorno: (traduzione alternativa)

To the left of the bridge, you can climb over a large boulder onto the bridge. The path leads through the conspicuous intersection to the top left back to the car. (approx. 15 minutes)

Intermediate + lower, incredible canyon. Relatively slippery. A dead animal next to the belay at the end of the intermediate section. All OK: anchors, jumps and slides (traduzione alternativa)

Good trip! Beautiful canyon. Water levels are okay. We took all the aquatic lines. Sometimes it looks impressive. But with some knowledge of the canyon and a good team good to go 📖 We did it with a training course. Only the intermedio
