Idrologia:

Accesso: (traduzione alternativa)
From Lago d'Idro on the SS 237 or from Riva del Garda on the SS 240 via Storo continue up the valley of the Fiume Chiese on the SS 237. About 2,5 km after the traffic circle where the road from Storo meets the SS 237, we come - still before the village of Condino - to a traffic circle again. Here we leave the SS 237 and at the second exit of the traffic circle we take Via Roma, which would lead us first through an industrial area and later on to the center of Condino. However, after only 300m we turn right, cross under the SS 237 for 180m and then, after a left turn, continue parallel to the SS 237 in a NNO direction. About 1 km after the underpass, the road bends to the right and crosses the Fiume Chiese. Here we park the car.

Avvicinamento: (traduzione alternativa)
From the car we keep half-left up over the stream. Passing the houses we take a forest road, which we ascend on the orographic. right side relatively close to the stream. For a shortcut we can take an inconspicuous path that later rejoins the track. About 120 meters above the starting point in the valley, a path branches off to the right - somewhat hidden - and leads on a narrow band through steep crags (partly exposed) into the stream.

Giro: (traduzione alternativa)
In front of you, you have the last (7) interesting rappels and avoid an elaborate and unattractive access from the top.

Ritorno: (traduzione alternativa)
When the opportunity arises, out to the right and down to the car.

Innox chain anchors are in acceptable condition. Water level is very low. Somewhat slippery in places. The highest rappelling point is closer to 32–35 m. Otherwise, a nice evening hike if you’re short on time. Total time: about 2 hours, including access and return. (traduzione alternativa)
