Stagione:	**Orientamento:**	**Tempo migliore:**
Valutazione: ☆ 2.5 (2)	**Info:** ★ 0 ()	**Belay:** ★ 1 (1)

Specialità:

Attrezzatura:
Corde: 2x 60m

Sintesi: (traduzione alternativa)
Rappel canyon with a 100-meter finale.

Idrologia: (traduzione alternativa)
After the summer, it has little water

Accesso: (traduzione alternativa)
14 km shuttle.

Valley side: Park your car at the Reninge Oratory.
Upper side: Drive from Passy to the village of Bay (D43). In the village, turn left toward Hauteville. Leave the road and follow the passable path to the hamlet of “La Trappe.” Turn right and park in the parking lot.

Avvicinamento: (traduzione alternativa)
Continue along the trail on foot until you reach the canyon.

Giro: (traduzione alternativa)
A descent with a drill to re-equip everything would not be a luxury; old anchorages +++, poor handling of friction, the C50 has two good RG spits, connected, well placed, then before the C100, take the RG anchorage (2 spits) to descend in the axis (12m) (attention, reform the anchorage with chains you can see + in RG of this anchorage) to the edge of the C100; from there, a mixture of old and new anchors awaits you, which goes a little awry. The relay is 50m further down, slightly to the G on a good ledge (3 points connected). You can see an exit at the exit of the C100 RD to reach the parking lot for the GR.

Bring your helmet!!! (as always...) lots of stone chips.... and the retrofit kit, because new obstacles can appear depending on the landslide.

Ritorno:

Coordinate:
Inizio del canyon 45.9497 6.6675
Fine del canyon 45.9438 6.6552
Parcheggio in uscita 45.9433 6.6526
Parcheggio all'entrata 45.9497 6.6675
Parcheggio Accesso alternativo 45.9450 6.6605
Partenza alternativa del canyon 45.9480 6.6622

Automatisch importiert von Descente-Canyon.com für Canyon Reninge We started at the upper entrance. If the barrier is open, you can park just before the start. After an hour (we didn't enjoy this section), we reached the alternative entrance. After a short hike along the stream, we found too many trees at risk of falling at the first rappel point, so we walked back and got out. Apparently, it's supposed to improve after that point, and a local plans to remove the trees in the fall. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2144/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Reninge Fait avec Jul'Fra, Lucas, Jules. top débit et météo.Départ 12h30, sortis de la C100 à 18h30. On a mis un peu de temps mais on a posé des points dans les goulottes où il y a les arbres, soit pour doubler les monopoints, soit pour faire des relais à coté des arbres qui bloquent la progression.Un peu d'hésitation au départ de la C100 dont le relai de tête est à refaire avec une gros coup de ménage. Au final on a pris le relai chainé ancestral mais encore bien costaud et avons rajouté 2 maillons rapides pour relier les multiples chaines. ça descend nickel et rappel de corde sans souci. Avons également rajouté un 4eme point en hauteur sur le relai intermédiaire à -40m, dont le premier point de la lignée de 3 commence à être franchement moisi...J'ai laissé un gros mousqueton noir en acier (mon primaire favori), au début des goulottes dans la section avec les gros troncs sur un relai que nous avons posé. Si qqn y a va avant que j'y retourne : Mikouze 0663023859, j'habite en bas de la cascade) (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2144/observations.html)
