Accesso: (traduzione alternativa)
From Agios Nikolaos on the so-called New Road (No. 90/E 75) towards Sitia, still passing Pachia Ammos (up to here 19 km). The road to Ierapetra (southwards) turns off to the right. We continue straight (east) towards Sitia and after 5 km we reach Kavousi. We drive through the village and turn right at the last houses and before the bridge (sign 'Archeological Site'). We drive up the concrete road, ignoring the turnoff to the 'Archeological Site' (2.2 km from the turnoff from the E75) and pass one of the oldest olive trees in Crete. Then we go downhill a bit and cross a streambed (4.3 km): on the right (south) ends the Mesonas, on the left begins the Havgas. Here we leave one car. With the other one we continue uphill. Before reaching the village of Melisses, we take the dirt road to the right after a gate (6.4 km). We cross a streambed and follow the dirt road uphill until we reach a saddle after a few switchbacks (10.3 km; 740 m a.s.l.). From here, the trail goes more or less horizontally to the south (on the right, below, a house, behind it the entrance to the gorge). At the head of the valley we cross 'our' stream and park the car about 100 m after it, where a stone staircase (above a water pipe) leads down to the right. For the access described by Bromirakis you have to go further (up to km 12,5).\nFor the ascent we recommend a four-wheel drive vehicle, but in any case one with more ground clearance than the usual passenger cars. On the orographic left side of the stream, however, there is also a path leading up to the entry (where it crosses the stream).\nIf you want to continue the Havgas, park the first vehicle in Kavousi (more detailed at the Havgas description).

Avvicinamento: (traduzione alternativa)
From the slope down the stone 'stairs', past the abandoned houses on the right to the streambed.

Giro: (traduzione alternativa)
From the access to the constriction about 20 min. in the stony streambed; alternative to be found at Bromirakis. 22 rappels follow.

Ritorno: (traduzione alternativa)
Upon reaching the slope out to the car or continue downhill in havgas.

Automatisch importiert von Descente-Canyon.com für Canyon Mesonas La 1ere partie est en eau, mais la fin est à sec. Il vaut mieux sortir à la fin du canyon plutôt que d'enchaîner avec havgas, car les vasques sont croupies. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21259/observations.html)
