Rappel canyon in largely open terrain.

Accesso: (traduzione alternativa)
Coming from Munich, it is best to take the highway towards Salzburg as far as the Bad Reichenhall exit (just before the Austrian border). Now head towards Reichenhall on the B 20. At the exit of the Bad Reichenhall bypass, leave the B 20 towards Lofer on the B 21/E 60. Shortly afterwards, drive under the ropes of the Predigtstuhlbahn and cross the outflow of the Kesselbach waterfall. Immediately after this bridge, there is a small parking lot directly on the banks of the Kesselbach (alternatively, just before the larger parking lot under the ropes of the cable car).\nAlternative access: via Schneizlreuth, then towards Bad Reichenhall.

Avvicinamento: (traduzione alternativa)
From the parking area by the Kesselbach stream, paths lead upwards roughly parallel to the course of the stream (orographically on the left bank). First climb steeply up the boulder field on the right, cross a small ditch and come across path tracks. Follow these upwards, as parallel as possible to the stream. In places, the climbing tracks avoid the steep sections in a wider arc, but always lead back to the stream. After about 200 meters of ascent, you reach the significantly flattened and widened upper part of the stream (striking terrain step with small pools and a large boulder lying on the edge of the terrain). Above this step, the stream is no longer worthwhile and is not permitted, so enter here.

Giro: (traduzione alternativa)
A very short, easy to climb canyon, well secured with glued anchors, charming views down to the Saalach. Exit possible at any time. The stream is very busy commercially, especially at weekends.
Currently (2012) the only stream approved for canyoning in Bavaria.
Conflict of interest between canyoneers and nudists.
Mudslide exit at the end of June 2010.

Ritorno: (traduzione alternativa)
Orographic. Get off to the left of the bridge and walk along the road to the car.

Kurze Tour, hat aber Spaß gemacht. Ich habe versehentlich oberhalb des Startpunkts angefangen. Die zusätzlichen Höhenmeter lohnen sich nicht. Alle Sicherungspunkte sind in Ordnung. Viele Ticks beim Aufstieg.

Stacks of single bolt rapells in suspicious rock, but otherwise a pretty entertaining little canyon. A handful of slippery abseils and short slides.

Water quantity has decreased significantly. Still ok, but not worth it with even less water. Hooked a fixed rope with a screw chain link to the destroyed anchors. This makes the rappel fun, but I doubt it will stay there for long. I recommend having a short sacrificial rope (approx. 3m to 5m) with you (traduzione alternativa)

Top water volume after a lot of rain, other canyons had high water today. Unfortunately someone destroyed the anchors on one waterfall. It was intentional. We therefore had to skip the most beautiful waterfall and take a dry route, a tree was available as a natural anchor (traduzione alternativa)
