A nice canyon, but with a lot of brown water. All hooks ok. We couldn't find the direct path to the upper parking, so we ended up taking the road, it took about 1:10h

Muddy muddy... Probe well before each jump or slide. A cave to visit on the left bank, with a few bats. (traduzione alternativa)

We also climbed via the slope to the frame. 10min. stream hike to the 1st rappel. A very beautiful canyon. Because of the murky water, you sometimes can't see how deep the pool is.... (traduzione alternativa)

In relation to my 1.Begehung anno 2019 nothing has changed decisively. Also this time we have chosen the convenient entry via the slope. Also has the advantage that possibly the employees of the small power plant take note that someone is now in the gorge zugange. All hooks ok. In the course of the descent, additional water was apparently drained from the small power station. Nevertheless, the flow was unproblematic. Consequently, there was also more water flow in the 2nd part of the channel used to exit. New photos:
