Sintesi: (traduzione alternativa) Beautiful granite canyon with spectacular final waterfall; several sharp edges; many slippery spots; some rusty belays, some exposed; adventurous mountain road.		
Idrologia:		
Accesso: (traduzione alternativa) From Locarno drive into the Maggia valley until you reach the village of Bignasco. Shortly after entering the village, turn right over the first bridge (Maggia), then immediately right again and straight ahead to the parking lot in front of the open-air swimming pool. Here you park the shuttle car (450m). With the 2nd car you drive back, but not over the bridge but through the beautiful village with stone houses. Then you continue to follow the steep narrow mountain road (not suitable for novice drivers.) to the church "Madonna di Monte". Arrived at the old church, there are several parking facilities (730m).		
Avvicinamento: (traduzione alternativa) If you only have 1 car, you can also go up on foot via the hiking trail starting in the village in the direction of Madonna di Monte (approx. 1 hour). From the church (parking lot), follow the gravel road to the last house. Then look for a suitable place on the right to climb through the forest to the stream (700m).		
Giro: (traduzione alternativa) The Bignasco is a beautiful open canyon. Despite the 2 high abseiling points of 70m and 85m, the canyon is very varied with several jumps and slides. Removable rope traverses are required to safely reach several exposed stands. Some slippery spots and sharp edges at the abseiling points require attention and rope-protecting techniques. The pools are usually deeply washed out and invite you to jump. After the approx. 70m abseil, the canyon becomes more continuous. This is followed by several shorter abseils, slides and jumps until the final waterfall at 85m. Beautiful views and curious glances from onlookers at the waterfall are guaranteed!		
Ritorno: (traduzione alternativa) Exit to the right after the final waterfall and you will soon reach the parking lot.

Not nearly as slippery as I thought. A few rusty anchors; they could use replacing. Otherwise, a nice stream with great rappelling spots. The 67-meter rappel is closer to 60 meters than 70. Dead chamois after the 67-meter rappel; it doesn't smell (yet). (traduzione alternativa)

Quite slippery, all stances OK but some of them a bit outdated. We drilled a stance in the "channel" (before C67) so that the ropes no longer get stuck when pulling off. (traduzione alternativa)

Stands and fixed ropes all in order. We had a rope jam in the C28 and had to cut a few meters. We forgot a steel carabiner on the first rappel. Water temperature 13 degrees. (traduzione alternativa)
