Valutazione: ☆ 3.1 (8)	**Info:** ★ 2.8 (6)	**Belay:** ★ 2.2 (6)
Specialità:		
Attrezzatura:		
Sintesi: (traduzione alternativa) Initially incised but still sunny canyon, then succession of waterfalls in the more open terrain.		
Idrologia:		
Accesso: (traduzione alternativa) A23 until Pontebba exit. Go down the Canal Valley to Chiusaforte. Before reaching the village, turn left into the Raccolana Valley. Follow the road through a tunnel and continue until you see a transformer station on the left. Then cross the bridge and about 50m after that you will find a small parking area on the Rio Rivis (next to it there is a small concrete building of unknown purpose). If you cross the Raccolana a second time you have gone too far.		
Avvicinamento: (traduzione alternativa) At the parking lot there is a thin but clear climb that leads steeply uphill between Rio Rivis and Rio Costa Stretta. Just before the entry into the Rio Rivis cross right towards Costastretta. Just before reaching the streambed, turn left uphill and cross under the walls until you can descend into the streambed. Alternatively, you can briefly follow a serpentine trail downhill and reach the canyon under a waterfall of about 30m over a grassy band.		
Giro: (traduzione alternativa) First in narrow but sunny gorge over several rappel down to 27m. Fuses were already in need of renovation in 2018. In the open part afterwards three more rappel before you are back on the road. There are a few mini slides and one low possible jumps. \n		
Ritorno: (traduzione alternativa) Shortly up the road to the parking lot		
Coordinate: Parcheggio Entrata e uscita 46.3960 13.3311 Fine del canyon 46.3962 13.3293 Inizio del canyon 46.3934 13.3300

We’re a bit further up and brought the 4 rappel anchors with us (they’re 4 somewhat worn single hooks with very small Rapid carabiners). Everything’s in top shape and surprisingly okay. In the lower section, all the chain anchors have new rings. We probably missed the second-to-last rappel point and had to rappel down into the crevice on the left, which doesn’t carry water (single hook with a rope). It probably would have been better to rappel down from the ring using at least a 60-meter rope. (traduzione alternativa)

A beautiful canyon, even more beautiful than the nearby Rio Rivis. The approach trail is the same as for the Rio Rivis; the turnoff is clearly visible, and we made our way under the rocks and across a side ravine to the start of the canyon (about 4 rappels down a 30-meter waterfall). It’s worth going all the way to the top. The traverse is then about an hour longer, but the anchors are still relatively okay. (traduzione alternativa)

We entered the canyon as described, but there is also a trail directly to the top of the large 30-metre waterfall. From here there are 2-point chained belays that are in excellent condition. Above the 30 m waterfall are 5 more smaller waterfalls with 1-point stands, 3 of which are no longer in good condition. (traduzione alternativa)

Well-secured and beautiful canyon that can also be combined with Rio Rivis. Simply follow the same access from Rio Rivis and cross to the right to Costa just before the entry. Then continue upwards to the stream. The last long rappel can also be easily rappelled in one piece (approx. 60m). The belays are well secured (chain with double anchor). (traduzione alternativa)

Nelle prime tre calate sarebbe da doppiare i singoli e sostituire le piccole maglie rapide. Dopo qualche calata minore compaiono le nuove catene austriache che permangono fino all'uscita. Forra continua ben più stimolante (e lunga) del Rivis. Per l'avvicinamento, il traverso verso il Costa Stretta, appena prima di arrivare al greto del Rivis, è ben battuto, anche se non ha i bolli blu. Dopo 100 metri di traverso salire ripidamente verso sx a zig zag, anche qui battuto, e superare un antro (affluente da riva dx Costa Stretta) e poi tenere la cengia in leggera salita fino ad arrivare sul greto, inizio della nostra discesa. Inquinamento nessuno.

New high standard chains on some belays, great choice for a high water level in this area.
