Specialità:

Attrezzatura:

Sintesi: (traduzione alternativa)
Short attractive rappel canyon with fun potential

Idrologia:

Accesso: (traduzione alternativa)
From the A 13 freeway in the direction of Chur, at the height of Sargans, turn onto the A 3 in the direction of Zurich. Drive past Lake Walen to the southeastern foothills of Lake Zurich and 51.7 km after Sargans you will reach the Lachen exit (No. 41). Here we leave the A 3 and drive in first direction OSO to Siebnen and from there in southern direction over the Sattelegg mountain pass (1190 m above sea level) to the Sihlsee. On the eastern shore southwards to Euthal. From here in (eastern) direction Lattbach to Obereuthal. Park your car at the "Besenbeiz".

Avvicinamento: (traduzione alternativa)
Continue on the little road, which is now closed to motor traffic, until after approx. 500 m on the right a bridge leads over the Chrummfluebach. Beyond, the path leads uphill on the orographic left slope of the Chrummfluebach, which crosses the Chilentobel here. After about 45 minutes (from Besenbeiz) you reach a steel footbridge at a slide brake. Here you rope down into the brook.

Giro: (traduzione alternativa)
In the first part quite open canyon; after entering the attractive narrow part can practically always jump or slide. However, it is sometimes inevitable that the first rappel and determine where to jump (!). Also suitable for beginners.

Ritorno: (traduzione alternativa)
After the exit of the gulch, turn right before the bridge.
After the tour I recommend the breaded "Plätzli" (in German: Schnitzel) in the Besenbeiz (I don't get any commission!).

There’s been a lot of activity here recently—the path is easy to walk on, the water is clear and still refreshing; there’s a lot of wood (which currently smells pleasant) that doesn’t get in the way too much and actually helps with downclimbing in some places. At the side entrance, the path to the tree is heavily blocked by cut branches. (traduzione alternativa)

The thunderstorm 8 days ago really cleaned things up. Unfortunately, there are a few large tree trunks in the nice slide. Otherwise, all the jumps and slides are doable. The last pool after the 6-meter jump has a depth of only 2 meters, but it’s manageable... Some of the anchors are starting to look a bit iffy and are very rusty or worn down. A renovation would be a good idea, since the canyon is visited very frequently. (traduzione alternativa)

Lots of snow on the access, partly knee-deep in snow. Middle entry with 50 meters from a tree stump above the path directly down. Lots of snow in the canyon but easy to walk on. Stands all ok. Extremely slippery in the water. Beware of snow, ice slides from the side. (traduzione alternativa)

Automatisch importiert von Schlucht.ch für Canyon Chrummfluebach / Chilentobel, Wasserstand: "mittel" Verankerungen: "ok" Schon wieder einiges anders....fette Baumstämme wurden teilweise vom Hochwasser halbiert. Immer noch Holz drin, aber nicht schlimm. Sehr griffig zum gehen. (Quelle: https://schlucht.ch/schluchten-der-schweiz-liste/1050-chrummfluebach-chilentobel)
