Specialità:		
Attrezzatura:		
Sintesi: (traduzione alternativa) Short attractive rappel canyon with fun potential		
Idrologia:		
Accesso: (traduzione alternativa) From the A 13 freeway in the direction of Chur, at the height of Sargans, turn onto the A 3 in the direction of Zurich. Drive past Lake Walen to the southeastern foothills of Lake Zurich and 51.7 km after Sargans you will reach the Lachen exit (No. 41). Here we leave the A 3 and drive in first direction OSO to Siebnen and from there in southern direction over the Sattellegg mountain pass (1190 m above sea level) to the Sihlsee. On the eastern shore southwards to Euthal. From here in (eastern) direction Lattbach to Obereuthal. Park your car at the "Besenbeiz".		
Avvicinamento: (traduzione alternativa) Continue on the little road, which is now closed to motor traffic, until after approx. 500 m on the right a bridge leads over the Chrummyfluebach. Beyond, the path leads uphill on the orographic left slope of the Chrummyfluebach, which crosses the Chilentobel here. After about 45 minutes (from Besenbeiz) you reach a steel footbridge at a slide brake. Here you rope down into the brook.		
Giro: (traduzione alternativa) In the first part quite open canyon; after entering the attractive narrow part can practically always jump or slide. However, it is sometimes inevitable that the first rappel and determine where to jump (!). Also suitable for beginners.		
Ritorno: (traduzione alternativa) After the exit of the gulch, turn right before the bridge. After the tour I recommend the breaded "Plätzli" (in German: Schnitzel) in the Besenbeiz (I don't get any commission!).

Lots of snow on the access, partly knee-deep in snow. Middle entry with 50 meters from a tree stump above the path directly down. Lots of snow in the canyon but easy to walk on. Stands all ok. Extremely slippery in the water. Beware of snow, ice slides from the side. (traduzione alternativa)

Water temperature 16 degrees, stands OK. A fixed wire rope is impaled and partially torn. Quite a lot of wood blocking some of the slides. (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Chilentobel DC+, bolts okay, water not that clear and in some parts unstable wood (take care); always a good idea for a half day trip. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22170/observations.html>)
