The water was 6c. A lot of water compared to Livinal. Between A3-A4. In the 66m shaft, one of the double anchors at 30 meters was missing, the other was loose. I replaced it, repaired it. This was my second time. Still wildly beautiful, with expedition-style construction. Not a beginner canyon. :))

Was walked by us and renovated. Beautiful gorge with a few walking passages. The initial part of the Livinal is particularly cool because narrow cut. Then it becomes a beautiful open canyon with a few walking passages. (traduzione alternativa)
