Idrologia: (traduzione alternativa)
A stream with a water intake; as a result, it usually carries very little water.

Accesso: (traduzione alternativa)
Park at the exit of the stream, in front of the military base.

Avvicinamento: (traduzione alternativa)
Hike up the trail into the valley, and at an elevation of 630 meters, head steeply down toward the stream. So far, the path is unmarked and steep, but if you time it right, you can get within 10 meters of the water without having to use ropes.

Giro: (traduzione alternativa)
You reach the streambed at an elevation of about 540 to 550 meters above sea level. The first boulder-strewn rappel section is then 20hm lower.

At first, the stream isn’t all that exciting. There’s a lot of downclimbing, and plenty of boulders lying around.

But the second half of the route is really good. You could also rappel down from the trail at 480m into the streambed to get straight to the best part of the route.

Ritorno: (traduzione alternativa)
At the last rappel point, there are already tracks leading back to the trail.

Coordinate:
Inizio del canyon 46.2399 9.1612
Parcheggio Entrata e uscita 46.2450 9.1540
Fine del canyon 46.2434 9.1572

Automatisch importiert von Descente-Canyon.com für Canyon Grono Wasserdurchsatz DC-, wenig rutschig. Im Zustieg auf der Höhe 630m den Wanderweg verlassen und steil zum Bach absteigen, die letzten 10-20m an einem Baum abseilen; zuerst im Blockgelände abwärts, den ersten Haken haben wir RD an der Felswand bei einem auffälligen Baum gefunden. Bei Sonne sicher eine sehr attraktive Tour (aktuell nur im Schatten), die mit jedem Meter schöner wird. Die Stände würden teils eine Maintenance gut vertragen. Der Kraftwerkmitarbeiter war sehr nett. Unfortunately, at this time of year, it’s in the shade all day. There are some recent landslides and fallen trees in the canyon. If the water level is high, or for added safety, additional anchors should be drilled. (traduzione alternativa)

Finding the entrance was a bit tricky. Lots of downclimbing in thw beginning. Becomes very interesting after that. For our descend, the water capture was fully open, which led to a nice water level
