Attrezzatura: Corde: 2x35m		
Sintesi: (traduzione alternativa) Narrow and short forest gorge under a water drainage		
Idrologia:		
Accesso: (traduzione alternativa) Leave the N-1 Lausanne - Geneva highway at Nyon on Lake Geneva and take the road towards Les Rousses, which winds up the mountain in a north-westerly direction. After 20 km, it meets the N-5, which soon reaches Les Rousses (2.5 km). The route continues via Morez and Morbier to St. Laurant, where the N-5 bends to the north (20.5 km from Les Rousses). We follow it for another 10 km until we turn right onto the D-16 towards Chaux-des-Crotenay. About 1.5 km after this village, turn left (D-127el) towards Les Planches-en-Montagne. Leave the car at the bridge (over the Saine) before the village (parking lot with signs). The canyon can also be reached from Yverdon at the south-western end of Lac de Neuchatel.		
Avvicinamento: (traduzione alternativa) We walk upstream through the park-like grounds on the south-western edge of the canyon. After about 250 m, you come to a viewpoint from which you have a good view of the canyon in both directions. After another 150 m you come to a dam with a power station. Cross this towards the other bank. Before crossing the last stream, turn left onto a walled "peninsula" and from there turn right into the river bed. The book mentioned below indicates a different entry - rappel approx. 30 m below the dam from the orographic right side for 15 m.		
Giro: (traduzione alternativa) Narrow and dark forest gorge, which opens up some possible jumps at the beginning. At the 30 m abseiling point, you can also abseil to a ledge after approx. 13 m and downclimb or jump the last 5 m from there. There are 2 other canyons nearby (Bief de la Ruine and Gorges de Malvaux).		
Ritorno: (traduzione alternativa) After the bridge, turn left up to the parking lot.

Automatisch importiert von Descente-Canyon.com für Canyon Langouette DC (200l/sec à la station de la siam). Magnifique étroiture ! Une belle descente mais trop courte (environ 1h pour notre 1ère). On a pu utiliser la tyriolienne d'un guide depuis la C5. Merci à lui :)Départ depuis le balcon n°1 (main courante puis rappel). On a remonté sur les MC en fixe pour accéder aux vasques en amont (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2201/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Langouette Parcouru à 11, il ne faut pas se faire embarquer par le débit mais ça passe bien. Les mains courantes sont en bon état. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2201/observations.html>)
