Avvertenzas:
Big problems with the shepherds at the exit
According to https://de.wikiloc.com/routen-wandern/riu-buddidorgiu-su-fossu-de-su-para-e-su-strumpu-de-costedda-24317533 the access from below is closed and it was allegedly already shot at intruders(!)

Specialità:

Attrezzatura:

Sintesi: (traduzione alternativa)
Long access, only one 50m rappel and a lot of walking passages - nevertheless worthwhile: beautiful rock, several jumps and wild surroundings - with a little luck you will meet turtles.

Idrologia:

Accesso: (traduzione alternativa)
Coming from the north on the SS125 via Tertali towards Cagliari. After the bridge over the Rio San Giorgio, at a small bar between two concrete columns, take a sharp right onto a sand road. After a few kilometers you reach two fords, then a farm on a hill. After that it's a short downhill again to a good parking place by the stream.

Avvicinamento: (traduzione alternativa)
Follow the road over a much deeper ford, then another 250m or so until a sand road branches off to the right. Follow this sand road in a wide saddle on the ridge and continue climbing along the ridge towards the NW. After a good hour, at N 39° 36.060 E 009° 31.819 \nein old mule track branches off (Steinmann, Su camminu de sa Contissa). After about 15min you climb over a gate and shortly after turn sharply to the right. The path becomes rocky for a short while and joins a crossing path on the plateau. At the crossing path turn left and after about 400m turn left again onto a slightly less clear path. When this path meets a jeep track, keep right onto a meadow. Here turn left into the streambed and descend in it (jungle feeling) to Rio Buddidorgiu. After a short fight with the undergrowth you suddenly stand in the 10-30m wide, yellow streambed on bare rock. Descend until you reach a large green basin. On micheleangileri.com there is a paid track, but the paths are also marked on OSM.

Giro: (traduzione alternativa)
Swim through the pool and hike briefly to the break-off edge of the 50m waterfall. There would be a tempting root just to the right of the break-off edge, but we rappelled down a branch of the tree about 15m further to the right (this rappel would be very happy with a sling and a chain link). After this rappel, you can actually pack up the rope again - everything from here on can be jumped or downclimbed.
Hikes and downclimbs alternate with jumps and small slides. The highlight is a huge travertine mushroom that can also be jumped (although the pool is quite shallow).

Ritorno: (traduzione alternativa)
When the canyon becomes flatter to the right on a clear path and follow it. When after about one KM jeep tracks lead up the mountain to the right, either follow this and return to the parking lot via forest roads or descend in or to the left of the streambed until a forest road becomes visible again on the right.
