Specialità:		
Attrezzatura: Corde: 1x30m		
Sintesi: (traduzione alternativa) Normally largely dry hiking and rappel canyon with some marmitas trampas. Ideal with filled pools. With water flow at the exit dangerous siphon.		
Idrologia:		
Accesso: (traduzione alternativa) After the A 7 has crossed the N 340, which is also a freeway, in the south of Valencia, we stay on the A 7 for another 62 km until we reach exit 61. Here we turn off onto the N 332 and continue for about 3 km to Oliva. From here, continue south on the CV 715 to Pego. From there, take the CV 712 in the direction of Vall d'Ebo. About 8 km after Pego we reach a plateau. Turn left at the replica of a windmill and continue for about 6 km (alternating between dirt road and tarred road) until you reach some houses on the right of the road. At the second junction of a tarred road to the west there is a signpost for hiking trails. Here we turn right, following the signpost 'PR-V147' and park the car in the open area in front of the houses (505 m above sea level).		
Avvicinamento: (traduzione alternativa) We take the trail 'PR-V147', which first descends in a southwesterly direction, then making a wide arc to the north, to the spring fountain 'Font del Reinos'. Then it descends westward into the canyon of the Riu Girona (waypoint 38.788864, -0.136900 - 290 m a.s.l.). From here it is about 15 min. to the beginning of the Infern.		
Giro: (traduzione alternativa) Up to 12 rappel; Partly difficult to go around the marmitas trampas or climb out of them.		
Ritorno: (traduzione alternativa) After the half-cave 'Cova Santa' and the exit of the technical-sporty part, we continue for about 30 minutes in the bed of the Rio Girona (keeping left at a fork). Then we reach the place where the path that descends from Fleix on the right slope in precise serpentines crosses the riverbed (180 m above sea level). We follow the path the left slope until we reach the road again at the height. On it a few hundred meters and we are back at the signpost and the nearby car.

It started out dry but there were several pools to follow. The water was not so inviting in the 2 large pools. If you have enough strength in your forearms, you can use the traversese ropes, otherwise -> fall📖. Very beautiful, deeply cut, smooth canyon. The way back is somewhat arduous. Équipements en bon état, mais certaines cordes de main courante mériteraient d'être renouvelées. (Quelle:

car sans problème! Pas eu besoin de combi malgré les pluies de la veille.Les vasques s'évitent sans soucis.

Chèvre sans tête en décomposition dans le 1er trou piège. Joli canyon malgré la marche d'approche et de retour!

Automatisch importiert von Descente-Canyon.com für Canyon Infern Nice canyon, all pools can be avoided with a

little accrobacy and airy handlines (in good condition), which can be tiring on the arms. (Quelle:
