

Lodrino (inferiore)

Lodrino, Val Lodrino

Creare: 2023-03-09 20:53:45	Aggiornamento: 2026-05-27 21:08:51	Stampa: 2026-06-07 09:06:47
Paese: Schweiz / Switzerland Regione: Kanton Tessin / Cantone Ticino Sottoregione: Bezirk Riviera Città: Lodrino		
Difficoltà: difficile	Grado: v5 a5 IV	Tempo totale: 3h50
Tempo avvicinamento: 15min	Tempo giaro: 3h30	Tempo ritorno: 5min
Altitudine di entrata: 490m	Altitudine di uscita: 280m	Altitudine delta: 210m
Lunghezza del canyon: 900m	Rapel più alto: 45m	Quantità rapelli: 16
Transporto: Auto facoltativa	Tipo di roccia: granite	Area di ingresso: 17.00km ²
Stagione: luglio - settembre	Orientamento: Nord-Est	Tempo migliore: 10-14 Ore
Valutazione: ★ 4.9 (32)	Info: ★ 2.8 (21)	Belay: ★ 2.6 (31)
Avvertenzas: inattivo: <i>Evitare il disturbo attraverso il canyoning di massa (11.08.25 - 31.08.25)</i> Dopo la RIC 2025 sono stati segnalati grandi gruppi che hanno causato rifiuti nei parcheggi, occupato proprietà private, festeggiato ad alto volume dopo il canyoning e parcheggiato senza considerare l'accesso degli abitanti locali. Le comunità locali sono già arrabbiate! Per evitare conseguenze negative e regolamenti, assicuratevi di agire nel rispetto dell'ambiente e delle comunità locali. Vi preghiamo di utilizzare ogni auto in modo completo per evitare la congestione dei parcheggi, di utilizzare parcheggi alternativi, di essere silenziosi, di limitare al minimo l'uso di fischietti nel canyon, di rispettare la cultura cattolica locale non spogliandovi in modo visibile e di utilizzare abbigliamento per la risalita. Non fate festa dopo il canyoning nei parcheggi e rimuovete i rifiuti per favore!		
Specialità:		
Attrezzatura: Corde: 2x 50m		
Sintesi: (traduzione alternativa) Rappel canyon in beautiful granite rock with optional jumps. Very beautiful, deep canyon with turbulent pools and crystal-clear water.		
Idrologia: (traduzione alternativa) Can only be walked on without risk after prolonged dry spells Indicative measuring point, no direct measured value: Little: <150l/sec; Medium: 150-400l/sec; Much: 400-1000l/sec>; Too much: 1000l/sec https://www.hydrodaten.admin.ch/it/seen-und-fluesse/stationen-und-daten/2612		
Accesso: (traduzione alternativa) From the freeway junction (Gotthard/Bernardino) north of Bellinzona on the N 2 northwards. Shortly after passing through Cresciano, turn left and drive to the other side of the valley to Lodrino (approx. 12 km from the interchange). Enter the village (on the right) and after the bridge over the stream take the 3rd street on the left. Park your first car behind the cemetery (not at the storage hall) (do not use the parking spaces in front of the supermarket and under the trees in the center of the village). With the second car, drive north towards Iragna and after almost 2 km (from Lodrino), immediately after the houses of Rodaglio, at a commercial establishment (GPS coordinates: 46°19'02.46 "N / 8°58'19.70 "E), just after an inconspicuous chapel, turn left onto a small road that takes us up to the houses of Legri (a fork to the right). - The road continues straight ahead until it ends in an open area (helipad) (or continues as a dirt road to the west). Park the second car here. The road to the upper parking lot is a private road with toll.		

Avvicinamento: (traduzione alternativa)

From the upper parking lot, descend on the mentioned slope and where it makes a left turn, turn right onto a path that takes you down to the stream in 15 minutes (entry). If you only have 1 car, walk towards the church and behind the church the hiking trail begins, which meets the access road. Follow this road to the left, at the turning point (helipad) turn right downhill. Straight ahead along the path to the stream. Access then a total of 45-60 min.

Giro: (traduzione alternativa)

The Lodrino is accessible without risk only after prolonged drought. If you look up into the narrows at the exit of the canyon (easily accessible from the orographic left side), you get at least an approximate impression of the situation. After some smaller slides and jumps, you are in front of the first real rappel point, a winding 15m channel. If the water level allows it, rappel 15m from the left, or cross to the right to the other exit of the pool and jump down 10m from there. After a few nice bends, you are in front of an almost vertical 11m slide. Dangerous rock bay on the left, keep right when surfacing. Can also be rappelled left. This is followed by an 8m rappel from anchors on the left and two narrow, winding rock canyons before the canyon widens considerably (pathless escape on the left). The second part of the gorge begins with a 7m slide and a 7m jump into a deep pool. This is followed by a very photogenic 9m rappel (Can also be jumped). The next, wild-looking 5m rappel either rappel in the water or bypass right on traversed rope. At the big rappel from two anchors on the right, rappel 5m (install rope traverse) to reach the actual belaystation on the left under the edge. Here it goes down 45m into a large pool. Here you can escape to the right. Pass the dam on the right and downclimb through the chaos of blocks. The last waterfall either rappel 37m from the right in the water jet, or traverse to the left over fixed ropes to a dry belaystation. Finally, rappel another 22m from the belaystation at the top right. Exit possible on a paved path after the 45m rappel. The chute at the beginning of the penultimate (37m) rappel can be avoided by rappelling out of the wire entanglement on the left above; but the turbulence down in the big pool cannot be avoided. Can be well connected with Lodrino med.

Ritorno: (traduzione alternativa)

After leaving the bottleneck left over the stone wall and gravel road back to the parking lot.

Automatisch importiert von Descente-Canyon.com für Canyon Lodrino (inférieur) Debit correct voire faible pour ce canyon à cette époque, de la neige présente sur les sommets mais la température assez basse n'a pas joué sur le débit pendant la journée.nous avons aussi descendu la partie intermédiaire. Le tob de 11 mètres dans le début de la partie inf était praticable mais attention au drossage en bas à gauche. Une personne en sécu sur corde peut être une bonne chose. Équipement en état. Corde en fixe dans le même état que les canyons de la région . Canyon tjrs aussi beau, un incontournable (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2672/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Lodrino (inférieur) RAS. Aucun problèmes liés au débit ou mouvement d'eau...Juste rester attentif à l'état des MC.Magnifique mais ca tout le monde le sait... (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2672/observations.html>)

2025-10-16 | Pepijn Hoeksema |★★★★★|📖★★★★|📍★|🌊 Normale |👍 Completato

Good trip

2025-10-09 | System User | |📖|📍|🌊 Alto |👍 Completato

Automatisch importiert von Descente-Canyon.com für Canyon Lodrino (inférieur) Débit d'eau similaire à celui de l'Intermedio, mais à notre avis, l'Inferior est plus facile à gérer que l'Intermedio en termes d'eau. Une descente de rêve au Tessin ! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2672/observations.html>)
