Sintesi: (traduzione alternativa)
Hiking, swimming and downclimbing in a narrow canyon

Idrologia:

Accesso: (traduzione alternativa)
Leave the A-9 'la Languedocienne/la Catalane' (Montpellier-Barcelona) at exit 41 just before Perpignan and take the D-117 through Rivesaltes in the direction of Quillan. Approx. 35 km from Rivesaltes you reach Saint Paul de Fenouillet, where you turn right (north) onto the D-7 (direction Cubières sur Cinoble).
After about 41½ km of driving, the last part uphill, you will reach a large parking lot at the entrance to the canyon, where you can also get a good overview. Park your car here.

Avvicinamento: (traduzione alternativa)
Continue along the road blasted into the rock high above the canyon until you can easily descend to the left into the streambed of the Agly.

Giro: (traduzione alternativa)
The canyon, which is up to 100 m deep, offers an impressive tour that is also heavily frequented commercially and is very suitable for beginners. A helmet is essential due to the risk of objects being thrown into the canyon from the road running along the top. Short ropes can be helpful.

Ritorno: (traduzione alternativa)
As soon as the canyon widens, turn left up to the parking lot. You can also continue for approx. 400 m through another narrowing (mainly swimming) and then up to the left after the dam (30 min.)
