Paese: Schweiz / Switzerland **Regione:** Kanton Wallis / Canton du Valais **Sottoregione:** Bezirk Monthey **Città:** Vionnaz		
Difficoltà: non così difficile	**Grado:** v3 a3 IV	**Tempo totale:** 2h
Tempo avvicinamento: 45min	**Tempo giaro:** 1h10	**Tempo ritorno:** 5min
Altitudine di entrata: 760m	**Altitudine di uscita:** 590m	**Altitudine delta:** 170m
Lunghezza del canyon: 430m	**Rapel più alto:** 25m	**Quantità rapelli:** 10
Transporto: Auto facoltativa	**Tipo di roccia:**	**Area di ingresso:** 2.80km²
Stagione: maggio - ottobre	**Orientamento:** Est	**Tempo migliore:**
Valutazione: ☆ 3 (6)	**Info:** ★ 2 (2)	**Belay:** ★ 1.8 (4)

Specialità:

Attrezzatura:
Corde: 2x 25m

Sintesi: (traduzione alternativa)
Dark canyon with towering smooth polished walls

Idrologia:

Accesso: (traduzione alternativa)
From the eastern shore of Lake Geneva - Montreux - up the Rhone valley in a southerly direction. After about 17 km on the N9/A9 you reach the Aigle exit (no. 17) and from here drive straight on in a westerly direction to Vionnaz (from the exit to the traffic circle in Vionnaz) for about 3 km.\nIf you are coming down the Rhone, the Aigle exit mentioned is about 21.5 km south of Martigny on the Autoroute de Rhône.\nFrom the traffic circle in Vionnaz, drive 60 m towards the center of the village and then turn half left after 60 m onto the Route de Torgon, which leads up to the village of the same name.
We now drive uphill in many hairpin bends. 150m after the 5th hairpin bend and 2.1 km from the start of the Route de Torgon, a track turns off to the right at an acute angle in a northerly direction. If it is rideable, you will reach the Tine de Mayen at the exit after about 500m on this forest road. Just beyond the stream we find a place to park the car.
If you have 2 cars available, you can take the second car another 5 km uphill (another 7 hairpin bends) and then come to a large parking lot (in 2015 this was a garbage collection point) just before the bridge over the Torrent de Mayen. We park the 2nd car here.

Avvicinamento: (traduzione alternativa)
If we only have our car(s) at the exit of the gorge descent, e.g. also in the case that we do without a transfer, we continue from the car on the slope for about 100m and then turn left at an open angle onto an old military path. This makes a wide turn to the left. At a right-hand serpentine at 775m above sea level, we take the path that continues straight ahead and walk almost level for about 300m in the direction of the stream. We try to continue on the indistinct tracks at about the same altitude. We pass a small stone wall. Behind this we come to a fairly overgrown path that leads towards the canyon. We walk downhill for about 100m, cross a meadow and 50m after its exit - the path now climbs slightly uphill again - turn left onto a thin track that leads us into the streambed, directly at the entry (750m above sea level - see sketch: http://www.swestcanyon.ch/Canyons/Tine/AccesTine.pdf). If we have parked a second car at the top (e.g. because we were confused by the access description), we first walk downhill on the wide path to the right of the stream. At a fork after about 150m we continue downhill. At about this point, you can descend into the streambed without difficulty, but then you have to walk a good distance down the streambed to the beginning of the gorge. Alternatively, you can continue downhill on the wide path (another 400m or so); here a wide path turns left towards the stream. However, it gets lost, then becomes recognizable again and allows us to descend into the stream just a few meters above the start of the gorge, 770m above sea level. For a sketch of these access options, see Brunner/Betrisey p. 162.

Giro: (traduzione alternativa)
In a gloomy atmosphere - when the sun isn't casting its rays into the canyon - we take one rappel after another. Smaller slides from time to time. Water flow is usually moderate.

Ritorno: (traduzione alternativa)
At the canyon exit in the creek or on the right next to it to the slope and then on the left to the car

Automatisch importiert von Descente-Canyon.com für Canyon Mayen RAS pour les installations. De + en + d'arbres/branchages. Se méfier sur l'avant dernier rappel là ou l'ancrage est caché sous la roche. La pierre est extrêmement glissante bien qu'elle n'en ai pas l'air. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21034/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Mayen Même niveau d'arbre que l'an passé. Quelques plaquettes rouillées qui pourraient être changées à l'occas mais ça passe... Un grand merci à ceux qui ont élagué la marche retour! (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21034/observations.html)

Some anchors could be replaced. The trunks are still there and in large numbers. Be careful, there's a wild boar carcass in the first cascade. (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Mayen Marche d'approche un peu laborieuse avec les indications, mais canyon qui vaut le détour avec un très bel encaissement. Quelques points vieillissants et plus à la bonne place. Et toujours pas mal d'arbres, notamment dans le rappel précédent la C17. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21034/observations.html)

Automatisch importiert von Schlucht.ch für Canyon Tine de Mayen, Wasserstand: "Ideal" Verankerungen: "gut" Wir sind bei der Brücke eingestiegen, weil wir die Abzweigung verpasst haben. Dieser Abschnitt ist voller invasiver Schmetterlingsflieder und wie ein Dschungel zu begehen, ich rate daher dazu, den richtigen Weg zu suchen. Beim Eingang zur Schlucht hatten wir Besuch von einer Gemsenfamilie mit drei Jungtieren. Diese lösten einen Kopf grossen Stein der 5 Meter neben uns zu Boden viel (der Stein stellt nun keine Gefahr mehr dar). Die Installationen waren alle in Ordnung. Vielleicht könnte jemand die Schlaganker bei C26 ersetzen, das wäre toll. Es hat viel Holz, das stört aber nicht weiter. Es gibt viele schöne Farne zu sehen. Automatisch importiert von Descente-Canyon.com für Canyon Mayen Equipement ok Toujours plus de bois dans le canyon.. Un grand merci à la personne qui est venu tronçonner, il ne reste plus qu'à espérer qu'une crue fasse un peu le nettoyage (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21034/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Mayen On a eu du mal à trouver le début du canyon, on a commencé bien plus haut et on a donc dû marcher un bon moment avant d'arriver au début..Sympathique canyon malgré les nombreux troncs qui traînent un peu partout (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21034/observations.html)
