Unfortunately, there wasn't much water, but it was still a great trip! The remaining belay stations have been repaired—everything is currently in very good condition. (traduzione alternativa)

I finally got to do this tour. An alpine abseiling gorge in a wild setting. Very little water at the top and sunny slab abseils; a bit more water starting from the spring that gives the canyon its name. After the beautiful 50-meter waterfall (visible from the parking lot), there’s unfortunately a tedious 10–15-minute downclimb before the canyon briefly becomes rocky again. We replaced two old Reebsnur slings and drilled two new anchors. The rest was still in surprisingly good condition (adhesive and expansion anchors, some with chains). (traduzione alternativa)
