Sintesi: (traduzione alternativa) Rappel canyon in granite below a water drainage. The highlight is the final waterfall - completely "invisible" from the outside due to the intersection.		
Idrologia:		
Accesso: (traduzione alternativa) From Domodossola northwards, bypass Crodo on the right on the through road and after the village turn right to Maglioggio. Cross the Fiume Toce and continue uphill. In the first hairpin bend to the right, you can turn left onto a dirt road to the stream. Park the (first) car there (other access to the exit described at CICA RUDE CLAN on the Internet). Take the second car up to Maglioggio. At the junction before the village, take the left-hand road to park if there is no free parking space in Maglioggio (approx. 17 km from Domodossola).		
Avvicinamento: (traduzione alternativa) From Maglioggio, follow the signs for Madonna del Ronco/Alpe Aleccio. You come to another road (closed to motor vehicles), follow it for a short distance, leave it to the left at a small chapel and later rejoin the small road. Follow it to a water drainage where you enter the Antolina (downclimb the ladder on the right).		
Giro: (traduzione alternativa) The canyon gradually becomes deeper and narrower until it exits with a 55m waterfall. The water falls down in a chute that is so narrow that you cannot see it from further out. Before the high bridge, there is an exit on the right up to the road. Slippery terrain.		
Ritorno: (traduzione alternativa) Approx. 200 m after the last rappel (C 18) turn left out and to the car.

Nice tour that gets better and better. 1-2 hooks loose or worth replacing. Ideal on the NM after e.g. Isorno (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Antolina Debit DC-. N'a d'interet que pour sa partie finale (à partir du pont). Amont sans interet. Chaque relais necessite de faire attention (risque de blocage de corde, monopoint, relais chainé avec point branlant, amat d'arbre, etc.). Ne vaut pas sa note au dessus de 3 car tres incomplet. Gigantic final waterfall, recommended tour. Exit on the left from the streambed is easy to miss. (traduzione alternativa)

Rather fewer slides, but a well-cut canyon with a botanical ambience. 55 m free-hanging rappel. Otherwise all stands good, except for one loose (but redundant). (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Antolina We did in the afternoon (start at 15:00) and had sun in the whole length of the canyon. Compared to the past, Antolina it is now clean and with very good grip - a very positive surprise! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21383/observations.html>)

Everything top notch. Absolutely amazing for me. So beautiful and the play of colors in the afternoon is better than Isorno. But of course a matter of taste. A must do... (traduzione alternativa)
