Sintesi: (traduzione alternativa) Conglomerate canyon for rappeling and rappeling (clamps and spreaders). Except for the hall at the end, a tiring "working canyon". Can be well combined with the opposite Cautiecho (see there).		
Idrologia:		
Accesso: (traduzione alternativa) From the road Barbastro - Huesca (N 240) about 25 km after Barbastro turn right on the A 1229 direction Abiego, Rodellar. A few hundred meters after Abiego, turn left towards Bierge. A few meters before reaching Bierge, turn right towards Rodellar (Bco. de Mascun). 8 km after this junction, in a slight bend to the left, is the starting point for the access. Under the tree, of which a substantial part has broken off, we park the car. It is the same starting point as for the access to Juncar.		
Avvicinamento: (traduzione alternativa) We take the track to the north and after the gate we turn right down (SE) to the headwaters of Cueva Cabrito (signpost). Following the existing tracks or pathless, we go through undergrowth to the streambed in Nagelfluh.		
Giro: (traduzione alternativa) Conglomerate canyon that becomes increasingly deepened and narrowed. Impressive halls at the end, before reaching the Rio Isuala.		
Ritorno: (traduzione alternativa) Upstream the Rio Isuala about 100m, then - before the next swimming passage from the "green strip" up westward (cairns). We meet a trail that goes up the hillside between Juncar and Cueva Cabrito. Before the stable, the track turns south and leads us to a gate and then to the car.

Automatisch importiert von Descente-Canyon.com für Canyon Cueva Cabrito Le canyon qui vous fera devenir chèvre. Le canyon est abtassif et parsemé de cadavres de nos amis caprins à différents degré de maturation. De beaux passages étroits (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/20820/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Cueva Cabrito La chèvre grouille de vie. Asticots à souhait. Vasques encore claires. Toujours aussi beau. Retour via estrechos de Balces.Nous avons perdu un téléphone. Si quelqu'un le retrouve, ce serait sympa de le déposer à l'Hosteria de Guara à Bierge à l'attention de Manon (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/20820/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Cueva Cabrito Parcouru à 3 en moins de 2h.Encore un filet d'eau, le cadavre de chèvre en décomposition est toujours présent au milieu, du coup 2 marmites à éviter tant que possible.Joli canyon qu'on a enchaîné avec Cautiecho sur l'autre versant en remontant los estrechos, pas de souci fans le Balces niveau débit.
