Specialità:

Attrezzatura:
Corde: 1x40m

Sintesi: (traduzione alternativa)
Very dangerous/life-threatening at higher water levels (unstable weather); very beautiful half-day tour; best sunshine from midday; water drainage in the upper part by the "Enel" power station, therefore usually little water in the canyon; several bolts for traverese rope construction available; it has often happened that water has been drained into the canyon unexpectedly. The rappels then become really challenging!

Idrologia:

Accesso: (traduzione alternativa)
see coordinates

Avvicinamento: (traduzione alternativa)
On foot (approx. 30-40min):
Directly next to the exit at the Enel power station, follow the pipeline up steep steps through the tunnel (a lamp is not absolutely necessary). After the tunnel, the path is flat until you reach the equalizing basin. Once you reach the basin, an iron footbridge leads over the concrete obstruction. Then bypass the basin on the left. Before the next iron bridge/stream, look out for the canyoning markings on the tree to the left (blue dot on a white background). From here, follow the markings through the forest.

By car (20min drive one way!):
From the cemetery, walk down the hiking trail to the stream in a few minutes --> entry at approx. 500Hm before the stone bridge right.

Giro: (traduzione alternativa)
The tour begins with a car transfer at the stone bridge at approx. 500m in the streambed and leads for approx. 20-25min through open terrain. In this part you pass the "Enel" water drainage after about 10 minutes (most of the water is diverted here). The wall can be downclimbed on the right-hand side.
If accessing on foot, the tour begins shortly before the first abseil point (35m, orographic left, rope traverse possible). After this highest point, the next rappel follows immediately (10m orographic right). Then there are some small steps and pools in open terrain before it cuts in for about 100m in the middle section (no lamp necessary). After an inflow from the left, you have a short stretch to the next 3 abseils, which are interrupted by short walking passages. At the end, the canyon narrows again briefly.

Ritorno: (traduzione alternativa)
The exit of the canyon is directly at the Enel power station before the bridge right at approx. 380Hm.

I've never seen a beach with so little water before. Still, it's always a really beautiful trip. (traduzione alternativa)

Low water level. Unfortunately, most of the canyon has filled in with gravel but the last pool is deep enough for jumping.

A truly fantastic canyon, everything was tip-top rappelling, jumps, slides, swimming, and a monumental setting where, at times, you feel as though you are inside a cave.

A complete, varied, and aesthetically pleasing canyon, highly recommended. Low water flow from start to finish, making it ideal for beginners. All the pools are deep and clean, allowing for two dives. Well-equipped with chemical anchors, although some are bent due to flooding. From the upper parking lot, it takes about 30 minutes of easy walking along the riverbed to reach the first abseil point, where you can put on your wetsuit.

Equipment is all set. Light current, a leisurely trip. It's still beautiful, though! (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Frondizzon Petit Filet du début a la fin, l'affluent n'apporte pas grand chose en plus au débit, mais ce canyon présente quand même de l'intérêt, très bien équipé la grande cascade de depart est très belle, et l'encaissement est absolument majeur (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21759/observations.html)

Hardly flowing but still nice. Anchor No. 2 needs to be fixed, one of the bolts is loose and the hanger is distorted (bring a key 17, and probably a new hanger).

Everything's great. Unfortunately, there's not quite enough water, but it's still really nice. Thanks, Horst, for marking it out. It turned out really great. Unfortunately, some parts have been filled with gravel, so a few jumps aren't possible right now. (traduzione alternativa)

Maybe not the best tour for adrenaline junkies, but for those just looking to enjoy a beautiful piece of nature this canyon is awesome.
