Paese: Schweiz / Switzerland Regione: Kanton Tessin / Cantone Ticino Sottoregione: Bezirk Leventina Città: Lavorgo		
Difficoltà: difficile	Grado: v5 a2 IV	Tempo totale: 3h43
Tempo avvicinamento: 10min	Tempo giaro: 3h30	Tempo ritorno: 3min
Altitudine di entrata: 960m	Altitudine di uscita: 640m	Altitudine delta: 320m
Lunghezza del canyon: 650m	Rapel più alto: 45m	Quantità rapelli: 8
Transporto: Auto necessaria	Tipo di roccia:	Area di ingresso: km ²
Stagione: maggio - settembre	Orientamento: Est	Tempo migliore: 9-13 Ore
Valutazione: ★ 3.5 (3)	Info: ★ 2 (1)	Belay: ★ 3 (1)
Specialità: Diga (informare l'operatore),		
Attrezzatura: Corde: 2x50m/ 1x40m		
Sintesi: (traduzione alternativa) Automatic weir system (danger of water surge!!!); usually little water in the canyon, but critical when there is a lot of water, so check the water level; call the power station operator; beautiful individual passages; vertical final section; slippery abseiling sections with some canyons; difficult emergency exit (left) before the vertical final section.		
Idrologia:		
Accesso: (traduzione alternativa) From Biasca take the highway or the main road in the direction of San Gotthard --> if you leave the highway, turn off at Faido --> turn right in the direction of Lavorgo --> after 400m turn right on the main road --> cross the river and go under the highway --> at the exit turn left along the narrow road to the waterfall (park here on the gravel on the left!). If you come from the highway, after the village of Lavorgo, continue north until you reach the entrance mentioned above (which in this case is on the left!). With a shuttle car you reach the narrow road (parallel to the highway) to the village of Nivo --> here continue along the mountain road to the first group of houses --> here on the right continue in the direction of Gribbio --> along the even narrower and steeper mountain road you reach a wayside shrine and 2 stone houses on the left side --> park here (approx. 1070Hm).		
Avvicinamento: (traduzione alternativa) From the houses, go right across the meadow towards the high-voltage pylons, where a warning sign and the descent path are already visible. From here, follow the path steeply downhill through the sparse forest to the weir at 960Hm. Check the water level!		
Giro: (traduzione alternativa) Arrived at the automatic water catchment (960Hm) you get over the railing with a short rope to the 1st stand (r) (If the water in the basin is already overflowing the canyon can become unpredictable) --> the canyon begins open with several rappel points of different heights and short walking passages --> the middle section begins with a beautiful chute in which you rappel 30m --> the following places can mostly be slid or jumped (Attention! on wood in pools) --> if you are not sure, it is better to rappel --> at the end you have a beautiful view into the valley --> here begins the most spectacular part of the canyon --> the upcoming ca. 150Hm are mastered in 6 parts; C10 (S8), C20, C36, R30, R38, R45 (good, safe rope technique are absolutely required here!) --> arrived at the bottom, the last boulders are downclimbed, before you stand on 650Hm in the streambed before the bridge.		
Ritorno: (traduzione alternativa) On the left side after the large boulders you will soon reach the parking lot (650Hm).
