Sintesi: (traduzione alternativa) 55m waterfall , to which you can get through a short narrow passage		
Idrologia:		
Accesso: (traduzione alternativa) We leave the N198 at Porto Vecchio in the direction of Zonza. After about 20 km on the winding D368 we come to the reservoir Lac de l'Ospedale. 900m after the exit of the dam is a parking lot with a few huts on the righthand side. Here we park the car. If we arrive from the direction of Bavella, Zonza, 13.5 km after Zonza (on the D368) we pass the new tourist starting point for a visit to Piscia di Gallu (large parking lot, etc.). Then, 2.4 km further, our parking place for the car is waiting.		
Avvicinamento: (traduzione alternativa) We take the - old - access path to the waterfall downhill, meet a small stream, climb again about 50m along a forest path and thus reach the plateau that lies above the waterfall. There we descend to the stream L'Osu and here we turn left to the beginning of the narrows.		
Giro: (traduzione alternativa) First, some smaller rappel in the narrow part at the beginning (possibly also jumpable/slideable after appropriate testing). Then we reach the pool above the high fall. Then the high fall (47m to the first impact at the foot of the fall), which is mastered on the left at the edge of the ray. At the bottom still a few meters downhill over slippery rocks.		
Ritorno: (traduzione alternativa) From here, take the steep path on the left up to the plateau, and there keep left on the approach path back to the car.

Automatisch importiert von Descente-Canyon.com für Canyon Piscia di Gallu Entre filet d'eau et DC- La cotation aquatique ne reflète pas du tout le niveau d'eau le quel j'ai parcouru le canyon, plus du A3Hyper bien mais très court je recommande fortement, avec plus d'eau, il doit être encore plus incroyable (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2334/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Piscia di Gallu Tres peu d'eau dans le canyon, coule encore , mais on voit que le niveau est très bas et l'eau un peu verte... d'ailleurs le niveau du barrage est vide ! J'ai hésité à mettre "petit filet d'eau" tellement c'est bas (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2334/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Piscia di Gallu La vasque suspendue avant la grande verticale ne pose pas de problème : pas de mouvement d'eau problématique, équipement abondant (possibilité de remonter au relai en RD). Plusieurs possibilité de saut plus bas que le relai si on souhaite. L'endroit ou on ressort de la vasque est protégé et n'est pas au niveau de la surverse. Sur le reste du canyon, l'équipement est bon. Quelques maillons vieillissants. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2334/observations.html>)
