Sintesi: (traduzione alternativa) Beautiful, open, not too long lime canyon; more https://www.opencanyon.org/de/canyon/5b6cb29e-596e-4f89-bdd1-5ae6cddf3bf3 ere walking and climbing passages; 55m final waterfall (can be bypassed on the left via emergency exit); beautiful pools with emerald green water; good places to stand.		
Idrologia:		
Accesso: (traduzione alternativa) From Tolmezzo take the SS52 main road towards Carnia --> after a long straight stretch you come to a highway bridge --> before the bridge turn left into the small side road --> here turn left along the road --> go under the bridge to the next bridge which you cross (exit Torrente Favarinis) --> park immediately on the right (gravel parking place) approx. 260m.		
Avvicinamento: (traduzione alternativa) From the parking lot, take the hiking trail (415) on the right for approx. 25 minutes up a steep incline to a ruin with a wooden bench at approx. 480m (see map). Follow the hiking trail for a very short time until you reach a tree with blue and red markings (left). Here you leave the main path and follow the marked path on the left for another 15 minutes (becomes increasingly steeper) to the entry at approx. 370m.		
Giro: (traduzione alternativa) Once in the streambed, you immediately start with the first abseiling point C16 (right/left) (chain anchor) in shallow pools --> jump or slide in deep pools --> short walking passages --> C28 (right) (chain anchor) or left (rope is required) --> bypass after the large rock block --> gorge becomes a little narrower --> short walking or abseiling passage in a narrow section of the gorge (very beautiful) --> after a large rock block --> bypass with a sling (rope is required, however). bypass, stand with sling (rope is required) --> canyon becomes somewhat narrower --> short walk, downclimb or jump passage in narrow canyon section (very beautiful) --> after the large boulder in the middle of the canyon and the 5 canyons in a row, the canyon turns right --> straight ahead and over a short downclimb to the next 15m step (this can also be downclimbed on the left) --> walk and climb --> narrow canyon section to an incised downclimb 16m chain anchor right/left (danger of swinging!) --> canyon opens and makes a bend to the right to a beautiful abseil (chain anchor left behind the rock), from the top right you can set up a rope traverse to the exposed chain anchor, then C25 in deep pools alternatively R30 top right. Possible jumps 6m, 10m and 12m (for the two higher ones you can climb up a little downstream to the right via a fixed rope) --> short walking and downclimbing passage --> short swimming section before the 50m final waterfall (!!! sharp edge) which exits in a large but shallow pool (here you can take the emergency exit on the left beforehand) 50m ropes are not enough, better 2x60m --> you can downclimb the gorge exit without any problems --> last jump 1m into a swimming pool.		

Ritorno: (traduzione alternativa)

Follow the mostly dry streambed for about 50m and then get off to the left before the bridge --> follow the small path to the parking lot.

Stand no. 5 very rusty and should be replaced. A few nice jumps that glow a wonderful yellow-green in the sunshine! (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Favarinis Sympathique canyon avec de beaux encaissements, quelques sauts répétables, un toboggan et de beaux rappels. Bien équipé. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2599/observations.html>)

Everything ok, water level still high after thunderstorms yesterday but falling fast. The 12m jump is doable with soft knees (traduzione alternativa)

Beautiful, quite short canyon with superiore finale. Anchors in good condition and drilled in perfectly for guiding. A bolt should be replaced at one belay (I think no. 5). (traduzione alternativa)

Nice short sunny canyon 60 meter ropes needed in the last waterfall

Last waterfall: 50 meters ... we used 60. In our opinion, 50 is too short. See also comment from 3.7.24 and 15.6.24 . All rappels to aic are ok and are all accessible without traversing rope. (traduzione alternativa)

I suspect that this is the upper limit of the canyon without lingering psychological trauma afterwards! Yesterday, there was about 1/2 as much water, and we suspected double the flow would be okay. Photo from the takeout.
