Sintesi: (traduzione alternativa)
Alpine forest gorge for rappeling

Idrologia:

Accesso: (traduzione alternativa)
From Imst on the B189 in the direction of Fernpass past the hamlet of Dollinger to the industrial estate at Miemingerstraße house number 60 (6.5 km from the traffic circle at the north-eastern end of Imst - see directions in the photo gallery), where we park our car in a suitable place to the right of the road.

With a second car, we drive back along the main road towards Imst, where we turn right uphill in Tarrenz and head for Obtarrenz. We continue uphill to the Kappa cross (signpost "Peregreithalm - Sinnesbrunn"). After a conversion distance of 9.4 km - the last kilometers on unpaved forest road - we come to Klammenbachl (see conversion in photo gallery).

Avvicinamento: (traduzione alternativa)
Along the stream, possibly already in the stream, the route descends to the first rappel.
An access without shuttle is described in the book by Riml/Amor (see also map section in the photo gallery).

Giro: (traduzione alternativa)
Initially a relatively open streambed. At an altitude of around 1200m, a forest path crosses the stream. Here you can get on or off before the more alpine parts (the path to the right takes you to Obtarrenz).
This is followed by the 2nd part with around 25 more rappels, partly in a heavily incised streambed.

Ritorno: (traduzione alternativa)
Get off at the road bridge and cross the road to the car.

Lower part as an alternative program due to the bad weather forecast! Access via the path right next to the gorge in 30 minutes! (traduzione alternativa)

Ascent as part of the gorge guide training, only the lower part was climbed. Everything was fine. (traduzione alternativa)

2026-05-01 | Simone & Armin | ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ ★ ★ | 〰 Basso | 👍 Completato
Walked the whole tour. Although you can "save" the upper part. It's something for children. The lower part is really nice. All stands in order. In the last third there is a dead chamois in the canyon. (traduzione alternativa)

2025-08-03 | Ralf Breitenstein | ☆ ☆ ☆ |🕮 ★ ★ |⚓ ★ ★ | 〰 Normale | 👍 Completato
The middle/lower, incised section is worthwhile if the water level is appropriate. In the narrow part, note the necessary intermediate belay (8m) before 25 m rappel, as described in Riml's topographic view. Lower part: lots of climbing with loose rock and scree. (traduzione alternativa)

2023-10-22 | Gregor Bernsteiner | ☆ ☆ |🕮 |⚓ ★ ★ | 〰 Basso | 👍 Completato
Upper part dry (up to abseilstation 24/ guide Riml&Amor), then low. Stands all OK (partly only one BH). (traduzione alternativa)
