Specialità:		

Attrezzatura:
Corde: 2x 40m

Sintesi: (traduzione alternativa)
Final section of the Rio di Menta, aquatic, technically demanding, great ambience.

Idrologia: (traduzione alternativa)
Only an emergency exit.

Accesso: (traduzione alternativa)
We leave the SS 33 (Gravellona - Domodossola), which goes up the Ossola valley, through the Villadossola exit, we cross the Toce river first in an easterly direction, after 2.8 km we reach the village of Beura, here we turn left and after another 1.5 km we reach the village of Quarata. Here we take Via Quarata to the right and park the car near the stream.

Avvicinamento: (traduzione alternativa)
On the road a few hundred meters north, before reaching the hamlet of Cosa, the trail branches off to the right and climbs steeply to San Lorenzo. Pass the chapel on the left, then turn right at the next fork and reach the ruins of the hamlet of Mura. We have now reached the canyon rim and follow the red arrows on a partly thorny path down to the stone bridge over the stream.

Giro: (traduzione alternativa)
At the beginning it is first necessary to overcome a stone chaos. Then follow 2 rappels to the mouth of the left side stream Focia. Now begins a constant alternation of rappels, jumps, slides and of course downclimbing. Technically demanding is then a handrail on the steep rock to avoid a descent in the beam at C 25. After a few narrow passages, you finally rope into the swimming pool of the village of Quarata.

Ritorno: (traduzione alternativa)
From the pool to the car.

Automatisch importiert von Descente-Canyon.com für Canyon Ogliana di Quarata Vraiment beau, merite le détour, plus ludique qu'on le pense de nombreux jeux sont caché.Et certains saut sont haut. Bien mieux que la variolaPar contre c'est glissant. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2652/observations.html)

Uno dei canyon più belli mai fatti... Siamo partiti prestissimo ma alla fine dopo 5 h compreso avvicinamento eravamo già fuori... Certe calate brevi si possono disarrampicare in opposizione... La calata nella fessura fatta sotto il flusso, nemmeno tanto alto... Da rifare con più calma

Automatisch importiert von Descente-Canyon.com für Canyon Ogliana di Quarata La marche d'approche vaut le coup, super canyon même si la première partie est assez pénible, une fois l'encaissement super.Orage commencé à 16h mais qu'avec très peu de pluie, comme souvent ces temps ci.Attention, le troisième dernier obstacle avec la main courante sur la droite n'est pas un saut ou en tout cas ne passe plus, mes pieds s'en souviendront. Relais sur arbre si besoin. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2652/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Ogliana di Quarata La marche d'approche est pénible mais le canyon en vaut la peine, pas tres ludique mais Magnifique. Le canyon est plutot technique, pas mal de mains courantes multi-points et goulottes. Attention très glissant par endroit une vraie patinoire. Un point manque juste apres l'etroiture sur un petit ressaut qui se desescalade... ça se fait mais dangereux du fait que ça soit très glissant (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2652/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Ogliana di Quarata Very low waterlevel for this canyon. Slippery, but nice as always. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2652/observations.html)

Pretty slippery—even less water than this time last year. But still beautiful. (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Ogliana di Quarata Water level exactly the same as on the 13/7/2020 photo. With this level the canyon doesn't pose any particular difficulties related to the water. It's very clear though that this would be completely different with a higher water level, because of very narrow passages; because of the fact that some small downclimbs aren't equipped and might be tricky with stronger flow; and that getting to the anchor at the end of a pool safely might also be hard with stronger outflow - not every anchor that could use one has a mains courant. Even with this water level the canyon is quite technical, we took 7h30 with a team of two, not knowing the canyon. There's a lot of work to do ;-) Very beautiful canyon though!!!!!!!!For the approach: a gps is useful indeed, but if you have on the approach to Mura is very straightforward (and beautiful). For the descent from Mura: in Mura there's a picknick table overlooking the valley. From there a path goes down on the left, after a couple of switchbacks it goes left and rejoins the path on the
