Paese: Schweiz / Switzerland **Regione:** Kanton Tessin / Cantone Ticino **Sottoregione:** Bezirk Locarno **Città:** Bassa Corippo		
Difficoltà: un po' difficile	**Grado:** v4 a4 III	**Tempo totale:** 4h50
Tempo avvicinamento: 1h	**Tempo giaro:** 3h30	**Tempo ritorno:** 20min
Altitudine di entrata: 705m	**Altitudine di uscita:** 475m	**Altitudine delta:** 230m
Lunghezza del canyon: 1500m	**Rapel più alto:** 45m	**Quantità rapelli:** 13
Transporto: a piedi	**Tipo di roccia:**	**Area di ingresso:** km²
Stagione: giugno - settembre	**Orientamento:** Est	**Tempo migliore:** 10-14 Ore
Valutazione: ☆ 4.2 (16)	**Info:** ★ 2.6 (8)	**Belay:** ★ 2.8 (12)

Avvertenzas:
Contaminazione da acque reflue (annuale 01.01. - 31.12.)
Il Cantone finanzierà la costruzione di un nuovo serbatoio per le acque reflue, ma ci vorranno circa 2-3 anni. È quindi probabile che si debba fare i conti con acqua contaminata fino all'inizio del 2029.

Specialità:

Attrezzatura:
Corde: 2x50m

Sintesi: (traduzione alternativa)
Attractive rappel canyon with fun potential.

Avoid the lower part - waste water from the village is currently being discharged into the stream.

Idrologia:

Accesso: (traduzione alternativa)
Coming from the highway exit Bellinzona Süd, cross the river Ticino, pass Locarno airport and then straight on at the traffic circle to the T-junction. Turn left here and follow the signs into the Verzasca Valley via Gordola, past the dam, along the reservoir to Vogorno (11.3 km from the crossing of the Ticino). From the center of Vogorno (church of San Antonio) we cycle another 2.4 km along the reservoir and then turn left onto the road to Bassa Corippo (560 m above sea level). With a bit of luck, we will find a place to park the car before Bassa Corippo.

Avvicinamento: (traduzione alternativa)
We hike through the village to its western exit. Here we take the path that leads us up to the hamlet of Costa (750 m above sea level). We follow it further in a south-westerly direction (hamlet of Orxino). We descend to the streambed where the entry point is.

Giro: (traduzione alternativa)
2 parts: upper A. rappel and jump, lower A. jump and slide.
Exit or access before the lower part at the old water drainage (540 m above sea level).

Ritorno: (traduzione alternativa)
Depending on the water level in the reservoir, the exit is either a slide into the water or a rappel followed by a jump into the water of the Verzasca reservoir. Then you swim to the other bank and climb up to the road.
However, if you have left the car in Corippo, climb up to the left immediately before the reservoir (when it is completely full, at the mouth of the stream into the reservoir). Through the bushes you reach an old path that you follow up to the village of Bassa Corippo.
The exit up to the right outlined by Nizzola in his book Eldorado Ticino involves some exposed ridge climbing at the beginning and is not verified.

Armi ok, acqua decisamente poca, non abbiamo fatto l'ultima calata (che entra nel lago) ma siamo usciti sulla sinistra idrografica risalendo a piedi in paese, così da evitare la navetta. La parte inferiore è estremamente scivolosa.

2026-09-23 | Martijn Poot | ☆ ☆ ☆ ☆ |🕮 ★ |⚓ ★ ★ ★ | ≋ Basso | 👍 Completato
Very low water but still beautifull. Rappel into the lake 20m, exit from lake unproblematic. When hiking out there is a small communal path between the houses which is a bit hard to find.

2026-09-17 | Bavarian Canyoning | ☆ ☆ ☆ |🕮 |⚓ ★ | ≋ Normale | 👍 Completato
We descended the lower section starting from the mill’s water diversion. The rock was very slippery, and all the pools were jumpable. We were only unsure about the last slide with a free fall, as several trees were wedged there (see photo). No current wastewater discharge from the village could be detected. The distance for the last rappel into the reservoir was estimated at approximately 25 meters based on the length of rope used. The exit from the reservoir was unproblematic. (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Corippo Peu d'eau.Après avoir passer sous le pont la roche ruisselle en rive gauche. De loin ça parait magnifique, mais l'odeur de l'eau et sa qualité laisse vite penser que les égouts du village se déversent dans le canyon. Dernier tob qui finit dans le lac magnifique! (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22219/observations.html)

Accessible from the mill. All slides doable. (traduzione alternativa)

2024-08-19 | System User | |🕮 |⚓ | ≋ Normale | 👍 Completato
Automatisch importiert von Descente-Canyon.com für Canyon Corippo Partie inférieure seulement. Le lac est bas, ça fait un joli toboggan (début à la corde pour nous). Pas de problèmes pour remonter en face, il y a même une MC encore en partie sous l'eau. Météo Suisse avait annoncé pas mal de pluie dans la nuit de samedi à dimanche mais aujourd'hui lundi le débit était plutôt DC-.
