Specialità:		
Attrezzatura: Corde: 1x60m + 1x50m		
Sintesi: (traduzione alternativa) There are 3 parts, where if you have time it is definitely recommended to do all 3 parts. The middle and lower are intensively commercialized. Nice, continuous, technical rappel canyon in gneiss rock; southern exposure; several emergency exits/escape possibilities, especially in the lower part; well set up; belay stations often placed exposed; fun slides; clean water; on sunny days a 3mm neoprene is enough.		
Idrologia:		
Accesso: (traduzione alternativa) From Domodossola South take the SS33 main road towards Milano. Then take the Piedimulera/Vogagna/Pallenzano exit. At the 1st traffic circle turn left towards Vogagna. At the next traffic circle turn right towards Piedimulera and at the 3rd traffic circle go straight on. Then keep right towards Macugnaga. From here follow the mountain road until just after the village of Vanzone San Carlo. Here on the left there is a large turnout where you can park your car. If you follow the road a few meters further, you can check the final waterfall/water level at the bridge/chapel.		
Avvicinamento: (traduzione alternativa) The access paths are well marked on the information board at the exit. Caution on many maps (including OSM) as of 2023 paths are poorly or incorrectly marked; those on the board fit well and the access routes are currently also well signposted. Access upper part: Follow the path or the signs until you reach the Alpe Briga houses (fountain to fill up with water). Follow the path back into the forest; after a few minutes a path branches off to the left. Mostly marked with blue dots from here. Alternatively (earlier) after Alpe Briga you will see a large conspicuous tree with a large stone Standing by the tree, you will see another stone towards the canyon on the lower right at the meadows/ bushes crossing. A path begins here. Both options are more or less visible; in any case you have to go down to the water catchment. This is the start of the superiore section. There are still a few worthwhile rappels further up - a suitable access will be worked out by the locals in 2025. Access superiore approx. 1h30 min Entry at the water drainage Access interm approx. 40 min (signs follow) Access inferiore approx. 10 min (signs follow)		

Giro: (traduzione alternativa)

For the upper part, downclimb from the dam on the left for about 1 minute to the first belaystation. Great tour in the upper part, which has now been well renovated.

Description from intermedio:

The descent begins with the entrance to a relatively narrow chute. This is followed by 11 rappels to the exit after this sporty part (810m altitude). In the lower part another 5 rappels in open terrain. Exit to the right before the road bridge (720m altitude).

The Lasino is an open rappel canyon with mostly little water. However, this should not mean that the technical passages, especially in the intermedio, should be underestimated. The canyon is very well equipped and there are plenty of sticky/drill hooks for the rope railing to reach exposed belays. Once you arrive at the entry of the Intermedio, you immediately start with a 30m abseil. This is followed by the next rappel. The highest point (50m) is in the middle of the Lasino intermedio (the belay can be reached by pulling off the rope traverse on the left side), after the high abseil there is a small step (approx. 10m), then a fun slide. This is followed by a cascade of 2x20m before a huge boulder blocks the way. Here you will find a small slip-through with bolts to overcome the slippery 3m. After this, the canyon becomes more open and less technically demanding. This is where the lower section (Lasino inferiore) begins. This is followed by several rappels into beautiful shimmering green pools with another casual slide towards the exit. After the slide there is a small rappel, a short downclimb/walking passage and the 30m final rappel (due to thorn bushes it is better to rappel in the water!) The tour ends before the stone bridge/road bridge at 730m.

Ritorno: (traduzione alternativa)

The tour ends just before the main road. Take the path on the right (left leads to private land).

If you want you can also go further; there were a few rappel more drilled that you can rappel to the next road.

Sempre fantastico, portata relativamente bassa per la stagione... nel pomeriggio aumenta per lo scioglimento delle nevi, avvicinamento ben segnalato.

Abbiamo percorso l'integrale! Saliti per sentiero che parte da Canfinello, molto evidente e facile da percorrere. Mancano un paio di ancoraggi , ma non è un problema perché sul lato destro (faccia a valle) si riescono a usare delle ottime piante per calarsi. Percorso in 5h30 circa.

Automatisch importiert von Descente-Canyon.com für Canyon Lasino (médian et inférieur) Beau !Débit très correct malgré les pluies de la veille. Équipement ok. Prevoir une C15 pour les MC.On est sorti à la route, ce qui permet de profiter d'un joli guidé en place au dernier rappel et d'un petit saut sous le pont. Sortie RG après le pont.
