Sintesi: (traduzione alternativa) Very long tour; physically and technically very demanding; only for very experienced canyoneers; no cell phone reception; be sure to check the water level at the exit (at the 2nd water diversion); several inlets in the lower part of the canyon; steep entry/exit in the middle section (near the hiking trail); very beautiful veining and washouts in the granite rock; some pools with strong current; beware of rope entanglement; clean, cold water.		
Idrologia:		
Accesso: (traduzione alternativa) From the campsite Solarium in Domaso (in front of Garvedona) take the road to Garvedona --> at the beginning of the village turn right to Livo (steep asphalt road) --> in the village Livo turn left to Dangri --> from the cemetery drive 2.8km on a bad gravel road to the exit of the road (limited parking before the bridge) (650Hm). There is a new ticket machine on the left at the beginning of the village Livo. Price 3€, also card payment possible at the machine; you have to indicate your license plate number.		
Avvicinamento: (traduzione alternativa) From the parking lot Dangri you go over the 2 stone bridges --> then you take the path on the right, which shortly thereafter divides --> here go up on the left to the abandoned village of Provego (940Hm) --> after the village you go over a bridge and continue up to the next houses of Pianezzola --> here follow the path above the houses to the right --> once you have left the houses behind you comes a large overgrown slope that at least offers a beautiful view of Lake Como -->at approx. 1030Hm the path clears --> follow the stone steps slightly downhill --> the path leads parallel to the canyon (entry/exit possibility) with small slopes up to the ruined mountain houses --> if you want to save the upper part (approx. 100Hm), you have a good possibility to descend over the meadow into the canyon at the big beech on the right side of the path (approx. 1200Hm) --> the actual entry is at 1300Hm after the houses.		

Giro: (traduzione alternativa)

The Bares is certainly one of the most beautiful and longest canyons on Lake Como --> due to the cut-off and the technically demanding sections as well as the cold water, only experienced canyoneers should enter this canyon --> the canyon has many short, demanding abseiling sections, whereby the pools are usually not visible --> jumps should also be enjoyed with caution --> without long walking passages, there is a constant change of narrow sections, clamping blocks and pools which can also be very turbulent --> in the middle of the canyon (approx. 900 m altitude difference) you will find an open section with a large rock slab on the right-hand side --> here there is a steep emergency exit (entrance). meters) you will find an open spot with a large rock slab on the right side, here there is a steep emergency exit (entry)--> if the water level in the upper part was already borderline, you should get out here, as the water level in the lower part is still rising due to several tributaries --> the 2nd half offers a unique gorge landscape with a large rock slab on the right side. The second half offers a unique gorge landscape with continuous successive rappels --> full concentration is required until the last rappel before you get out at the water drainage --> an additional mental burden to the seclusion is the permanent noise level that you leave behind you after the tour. On the whole, however, a perfect canyon.

Ritorno: (traduzione alternativa)

From the water drainage descend right over the metal steps and follow the path --> after about 20min there is another water drainage --> pass it until you reach the starting point (Dangri) again after another 15-20min.

The parking lot indicated in the application is better not to enter on the weekend, because it is full, so you need to add an hour or so to get there by road and the same extra for the return. We did from the middle, entered Exit No. 2, access from the hostel about 1.5 hours, canyon 4 hours. It was beautiful 📖 (traduzione alternativa)

We entered in the middle. Beautiful places; beautiful rock. Anchors all still there. (traduzione alternativa)

All hooks top. Very many jumps possible Partly a bit slippery (traduzione alternativa)

All stands secured with double adhesive hooks. Very many jumps possible. However, a few pools look deeper than they are due to the dark green color, you should not be tempted to jump in everywhere without checking. (traduzione alternativa)

Perfect weather for this great gorge, the hook missing during an ascent about 10 days ago can be climbed / slipped down without any problems. A few Abletterstellen because of yet "good water" difficult to climb off but all doable. (traduzione alternativa)
