<b>Specialità:</b>		
<b>Attrezzatura:</b> Corde: 2x 60m		
<b>Sintesi:</b> (traduzione alternativa) Relatively low water rappel canyon, largely open.		
<b>Idrologia:</b>		
<b>Accesso:</b> (traduzione alternativa) From Nice, head north on the N 202 towards Digne. After 20 km, turn right into the Vesubie valley. Continue on the D 2565 for about 10 km until shortly before St Jean la Riviere, the D 19 climbs up at an acute angle to the right. Follow the D 19 to the bridge over the Vallon de la Peira. Parking is available near the bridge. If you have a second car at your disposal, you can drive back towards St Jean la Riviere, turn off to Le Collete and follow the road up several hairpin bends until you find some parking facilities on the left just before the exit.		
<b>Avvicinamento:</b> (traduzione alternativa) Follow the road to its exit and follow the marked path at an information board (marker "130"). The newly renovated footpath first leads southeast along the slope, later winding up through the forest to a prominent shoulder where the view opens up to the east. Shortly after this point, turn right off the previous path on a path and cross slightly downwards to the streambed of the Peira.		
<b>Giro:</b> (traduzione alternativa) Attractive rappel canyon when water is flowing (visible at the road bridge, where you can also see the last high rappel); scenic access. Initially just a forest gorge with small slides and rappels before you reach the first high step. Right via hand ropes to the actual anchor on the right of the edge (50m, exposed). After three low rappels, one of which is jumpable, you are in front of the second high rappel, which is the key point of the tour. Either descend 60m in one or rappel about 15-20m to a hidden belay below the uppermost sinter terrace, the tempting-looking belay above can only be reached via a windy root deviation. Then rappel 45-40m from the intermediate belay to the pool below the waterfall. Beautiful passages with some possible jumps then lead to the last high waterfall. Either rappel 60m in one rappel or abseil 15m+45m from a hidden but comfortable intermediate belay on the left.		
<b>Ritorno:</b> (traduzione alternativa) After the last rappel, turn left along the bank to the road bridge. Follow the road for 1 km back to St Jean la Riviere (altitude 300 m above sea level).

Gli ostacoli principali sono le 3 grandi verticali, attenzione al relais per raggiungere la seconda, non entrare nella goletta, sosta in alto a destra appena prima. Ambiente aperto, tante possibilità di ripararsi in caso di eventuale piena. Ancoraggi top.
