Sintesi: (traduzione alternativa)
Conglomerate rappel canyon with water flow into the summer

Idrologia:

Accesso: (traduzione alternativa)
From Barbastro in the direction of Alquézar. After about 20 km on the newly extended A-1232, turn right at the junction at the Rio Vero bridge (beyond the Camping Rio Vero bridge) and continue on the A-2205 via Colungo in the direction of Arcusa, Ainsa. The road now winds its way northwards. You cross the Bco Palomeras Fornocal (8.1 km from Rio Vero bridge). On the other side of the bridge, we can park our car on the left-hand side of the road.

Avvicinamento: (traduzione alternativa)
From the car we take the path that heads east at the northern end of the bridge, on the orographic right slope of the Barranco. We cross the bush zone and then immediately descend into the streambed.

Giro: (traduzione alternativa)
6 rappels down into the narrow, dark gorge. We then walk and jam along the bottom to the Fornocal.

Ritorno: (traduzione alternativa)
Directly from the end of the gorge on the opposite slope, ascend onto a path. The first few meters are indistinct, then the path soon becomes more clearly visible. A rope safety device and a massive concrete staircase help you over a conglomerate upswing before the remaining meters of altitude are overcome with steep hairpin bends.

Automatisch importiert von Descente-Canyon.com für Canyon Palomeras del Fornocal très beau canyon, avec marche d'approche très rapide on voit le début du canyon de la route, retour rapide mais très raide en aval du pont (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2803/observations.html)

Unfortunately, there are completely dry, stagnant, and smelly pools that you have to wade through. It’s very narrow in places. Not recommended without water. The atmosphere is certainly quite nice when it doesn’t stink. (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Palomeras del Fornocal DC - - a la limite du petit filet. Court, efficace et très esthétique. Les estrechos sont superbes. Une carcasse de petit chevreuil sur les derniers mètres. Retour en remontant le Fornocal. Ne pas rater un cairn rive droite avant d'arriver aux piles du pont (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2803/observations.html)
